

Bruce Highway Upgrade

Caloundra Road to Sunshine Motorway

Construction notice

April 2017
Ref: CN08

Major construction on schedule to start in mid-2017

Major construction for the Bruce Highway Upgrade – Caloundra Road to Sunshine Motorway is on track to begin in mid-2017. The project involves upgrading the highway from four to six lanes including major upgrades to both the Caloundra Road and Sunshine Motorway interchanges.

Preliminary activities are scheduled between April and May 2017 across the project site to enable major construction works to commence. The following activities will be carried out in the lead up to major construction:

- weed spraying and removal
- vegetation trimming and removal
- construction of site accesses
- establishment of satellite offices near work zones
- fencing and surveying
- relocation of water, electricity and telecommunication services
- installation of traffic barriers and other site controls
- rock importation and dam filling
- commencement of earthworks
- drainage works.

Activities will progressively roll out across the site from the southern to the northern end of the project area. In the first stages, the work zones will be adjacent to existing roads, with approximate locations shown in the maps overleaf.

It is important to note that these activities are dependent on weather and site conditions.

Working hours

A combination of day and night works will be undertaken to complete these activities.

Works will be completed during the day whenever possible. Due to the nature of the works and the proximity to live traffic, some activities will need to be completed at night when traffic volumes are lower. This will ensure the safety of motorists and workers.

Working hours are:

- **Day works:** Monday to Friday, 6am to 6pm.
- **Night works:** Sunday to Thursday from 8pm to 5am.

What to expect

- **Traffic control:** Localised traffic changes including reduced speed limits, road shoulder and lane closures, changes to traffic flow and short-term traffic disruptions. Traffic controllers and/or police may be in place to assist and direct road users.
- **Audible noise and dust:** Audible noise and possible dust from construction activities and heavy machinery can be expected. Reversing beepers and flashing lights are a safety requirement and will be used at all times during work hours.
- **Increased construction traffic:** Residents can expect increased construction traffic travelling near the work zones.
- **Temporary lighting:** Lighting towers will be used to light work areas at night.
- **Access:** Access to residential properties and businesses will be maintained at all times.

We thank the local community for their patience and cooperation during these vital works.
