UCEENSIAND		2-14-3394 QUEENSLAND
Memoran	dum [1 3 JAN 1897	Queensland Department of Transport Our Ref: 97/001 Your Ref: Date: January 10, 1997
то:	Captain J Regan Senior Adviser (Investigations)	
SUBJECT:	"Rigid Too", injury to passengers, Point	: Lookout, 29/12/96
	Investigation Report	

The "Rigid Too" is a dive boat operated by the Stradbroke Island Scuba Centre and on the day in question had taken 9 divers out to dive on Flat Rock, off Point Lookout. Just prior to there return to shore the vessel encountered a freak wave off which the vessel fell heavily causing a couple of injuries to two of the divers.

This investigation has found that:-

1) The dive master briefed all the drivers before going out on the trip.

2) vessel was anchored in the lee of Flat Rock, ie on the WNW side being the lee from the SE wind and E'Ly swell.

3) After the allotted half an hour 7 of the 9 divers surfaced alongside the boat.

4) the remaining two divers surfaced 300 meters away in a southerly direction contrary to their briefing,

5) the vessel had to up anchor and proceed to pick them out, taking the vessel out of the lee of the Rock.

6) After having retrieved the two divers the Master had to turn the boat into a freak wave to avoid being swamped, then fell heavily off the back side of the wave causing the injuries

This incident probably would not have occurred if the all the divers had adhered to their briefing before going out. The Master says that he took the matter up with the two divers concerned.

The Master did not fill out a Marine Incident report form, but seeing that he reported the incident directly and within 24 hours, plus his report was detailed enough he has not been asked to do so. A Marine Incident report form has been mailed to him for future use.

It is recommend that no further action be taken in this matter as there has been no fault or wrong doing on the part of the Master of "Rigid Too"

(Capt P J Marchbank) TEMPORARY ASSISTANT HARBOUR MASTER (BRISBANE)

memos

30-DEC-96 MON 09:24 STRADBROKE ISLAND SCUBA 07 3409 8588 P.02 2-7-773a 1: Incident Report on boat "Rigid Too" Registration no. DATE OF INCIDENT : 29.12.96 TIME : 3pm. PLACE : FLAT ROCK - PT. LOOKOUT SKIPPER & DIVE MASTER : INCIDENT : A LARGE SWELL LIFTED UP THE BOAT AND AS IT CAME DOWN TWO DIVERS SUFFERED MINOR INJURIES. WEATHER CONDITIONS SOUTH - EAST WIND 5- 10 KNOTS SWELL 1 - 1.5 m. WATER VISIBILITY 25m. DETAILS at 1.45 pm on 29.12.96 with 9 quelified sailea divers on board "Rigid Teo" I left for a dive at Flat Rock after a safety wrief on the headh prior to departure. We launched the boat on Flinders beach near adder Rock. 2

135-04877.pdf - Page Number: 15 of 66

Bld dive regulations and suggested a dive plan of the area. after a 30 minute dive Seven divers surfaced next to the boat and came on board according to the suggested dine plan. as I was putting some of the gear away one of the divers on the boat drew my attention to the fact that the two remaining diviers (namely and his dive luddy were approximately 300 metres Sch.4 Part 4 s.6 PI away from the boat; well away from the planned duie site. They had their safety sausages inflated and were drifting away from the boat. We picked up the anchor immediately and motored towards the two divers to pick them as soon as the 2 divers were on board and 9 turned the boat into the swells a fireak two metre swell emerged in Front of our boat and I had to drive into Ain order For the boat not to be swamped. after riding up the swell the boat was air borne for a few seconds until I hit the water again

MON 09:26 STRADBROKE ISLAND SCUBA

P.02

I turned around to ask if everybady Sch.4 Part 4 s.6 Pl had his hand on was ok. his back with a look of pain but said just keep going approximately 10 minutes later when we landed back at Flinder's Beach showed me his swollen and bruised Then he informed me that as the voat came down one of the air tanks Hew out of the special tank holder and slight hit his as well. Write I brought back from the beach on the boat to our shop. but walked back through the park. On arrival at the shop 9 made comfortable, elevated his injured , put ice on it and called the ambulance. The ambutance officer wrapped his and took him to Dunwich Hospital for further checks and treatement. He also took as well. This is the completion of my report.

# **MARINE INCIDENT REPORT - 99142**

1

### PARTICULARS

#### THE VESSEL

The vessel involved in this incident is a 6.3 metre Naiad ridged inflatable powered by a 115 h.p. Yamaha outboard with a centre console as a steering position, 2.2 m beam and a maximum load displacement of 1400 kg or 18 people. Attached is a full list of specifications given by Naiad at Wynnum Marine, the manufacturers.

#### **AREA OF INCIDENT**

The area the incident happened is a strip of beach known as flinders Beach which is situated on North Stradbroke Island (refer attached chart extracts of area).

Flinders Beach is a local name for this area that is why it is not shown on Queensland Transport charts. The area of beach has a gutter which is situated approximately 100-200 metres from the beach which allows vessels to be launched off the beach into relatively calm water.

#### **VESSEL OWNERSHIP**

The owner of the vessel JL 176 Q is the Underwater Research Group Queensland which is a club which has an address of Yeerongpilly. The vessel was registered at the time of the incident and is current until the 17 December 2000 as a recreational vessel.

#### THE CLUB

The club is a registered club with the name Underwater Research Group of Queensland and is open to the public and currently has approximately 90 members who all pay a joining fee to become a member.

The club owns a 6.3 metre RIB which club members can use as long as they are with authorised members of the club. The guide lines to become an authorised person are set within the club.

To take the vessel out on the water you need to have an authorised driver of the vessel on board. This person must be on board for the vessel to be operated and stand on the right hand side of the person driving and oversee the vessel's operation and take over if they do not think the person is operating safely. This is whether the driver of the vessel has a Recreational Ship Master's Licence or not. RETHER

Along with a joining fee the member must make a donation and depending on how big the donation is, has a bearing of how many dive trips you may go on. The donation gets you to the dive site on board the 6.3 metre vessel and back again and any money left outstanding is put into an account and is used for maintenance to replace the vessel when the time comes.

# THE INCIDENT

At approximately 1100 hours on 26 September 1999 the Underwater Research Group of Queensland (URGQ) were aboard the 6.3 metre RIB and returning to flinders Beach from Flat Rock with nine (9) persons on board with all their diving gear after completed a dive.

At this stage the person in control of the vessel was ch.4 Part 4 s.6 Pwith the person responsible for the vessel being who was standing beside I. It is unclear which side was standing on as there has been conflicting stories given by the passengers during the Record of Interview.

It is also unclear as to events leading up to the incident as there are also conflicting stores about whether the wave zone was assessed or not.

The vessel then appeared to fall off the back of the wave, then picked up by a following wave and turned over and swamped, thus damaging the canopy. Most persons were thrown clear with dive weights being lost along with some other personal gear from various persons.

The vessel was then swam into the beach and any lost gear retrieved, if found.

# COMMENT

My investigation has found the following.

The sea conditions on the day were moderate with choppy conditions and a wind of approximately 10-15 knots. The driver of the vessel, while holding a Recreational Ship Master's Licence was inexperienced on the operation of a vessel of this size and also in a wave zone. It is my opinion that this was a contributing factor to the incident.

was in control of the vessel with passengers on board who had no idea of driving ability and the only relationship the passengers had to was that they were all members of the same club on the same trip. The person in charge of the vessel has a duty of care to the passengers on board. RETURNED THE

The vessel would have been carrying approximately 1000 - 1200 kg. Which would have been within the 1400kg guide lines. But not being a commercial vessel it does not have to meet any survey requirements eg stability and performance and therefore it is hard to evaluate the operation of the vessel in open waters. There were inconsistencies in who was in charge of the vessel and who was perceived to be in charge by the passengers on board and by the drives the d

3

This not only puts the driver of the vessel in two minds of action to take as he is not in full charge of the vessel.

This situation also puts the passengers of the vessel in grave danger as their lives are in the hands of a person in control of the vessel but not in charge.

On a recreational vessel carrying passengers this is a recipe for disaster.

On a commercial vessel eg a dive boat, the person in control of the vessel is also in charge and holds a manning certificate which means the person has successfully completed a practical and theory evaluation by an accredited person from Queensland Transport to say the person can operate the type of vessel in the conditions of which the person is capable in operating.

The club obviously sees a need for persons to achieve higher training than a Speed Boat Driver's Licence or Recreational Ship Master's Licence to be in charge of the vessel or they would not require an authorised officer within the club to drive the vessel, because the U.R.G.Q. is not an authorised training provider and is not able to issue an authorised Manning Certificate.

# **HISTORY OF VESSEL TO DATE**

On 23 August 1998 the same vessel had an incident where the vessel took water over the bow and broached the vessel overturning it throwing the crew and effects out of the vessel.

Marine Incident # 98103 investigated by Allan Nichol, Senior Sergeant, with Brisbane Water Police.

Post Incident on 26 September 1999.

This vessel has also been swamped after this incident and is being investigated by W. Flegg from the Brisbane Water Police.

In total, approximately 25-30 persons have been thrown out of this vessel in an uncontrolled way within the last 18 months in similar incidents.

RET - DET

# CONCLUSION

This incident is within the meaning of Marine Incident as prescribed in Transport Operations (Marine Safety) Act, Section 123 (2).

I consider that while this is a marine incident, the Marine Incident form needs to be filled out by the master of the vessel which in my opinion, is not as he was not the master but this will not change my final recommendations.

4

There are two main factors that I believe caused this incident.

An inexperienced driver of the vessel. A vessel with suspect stability and performance.

#### RECOMMENDATIONS

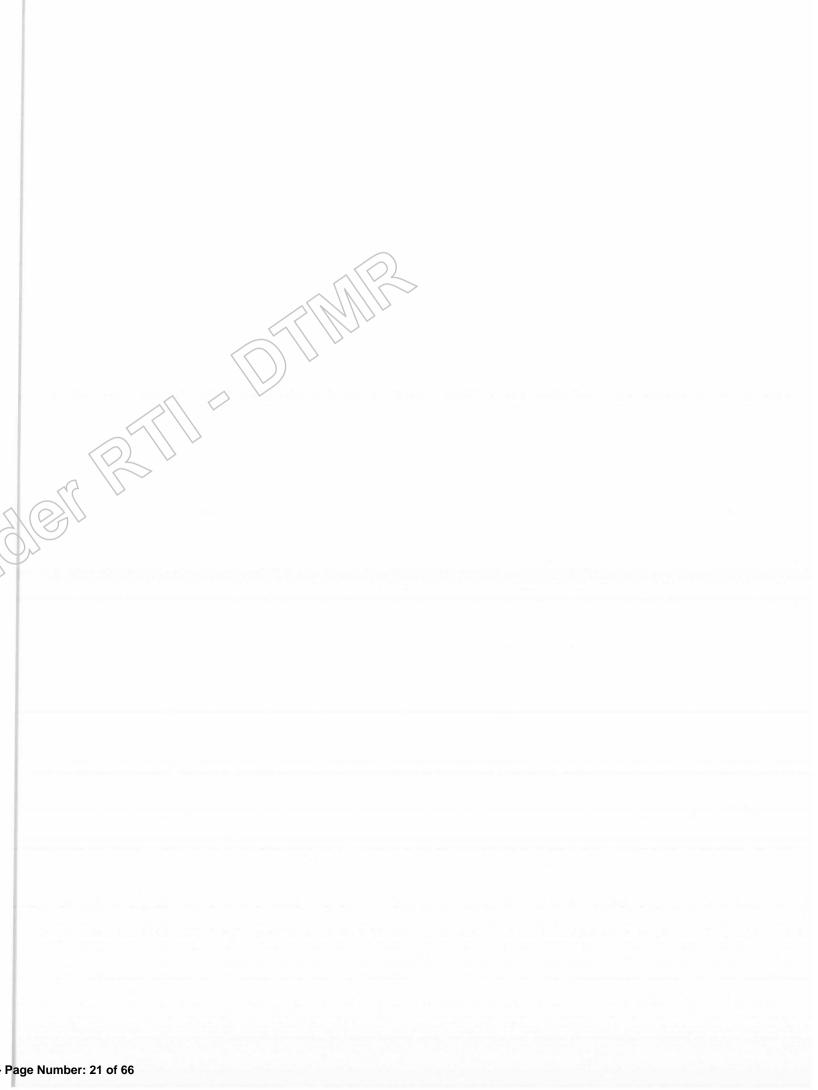

1. No further action be taken towardsch.4 Part 4 s.6 Pthe person who submitted the Marine Incident form as it is my opinion that while being in control of the vessel and holding a Recreational Ship Master's Licence, was not in charge of the vessel as he was not an authorised driver within the club. does not come under the definition of the word master as he was not in charge of the vessel.

2. That this quasi commercial club cease operation until all/and any outstanding investigations can be finalised and assessed by the Regional Harbour Master and establish whether this operation can proceed legally as it is. The reason for this cease of operation would be to prevent any further similar incident happening and preserve life (money is paid for a trip aboard the vessel if only a small one).

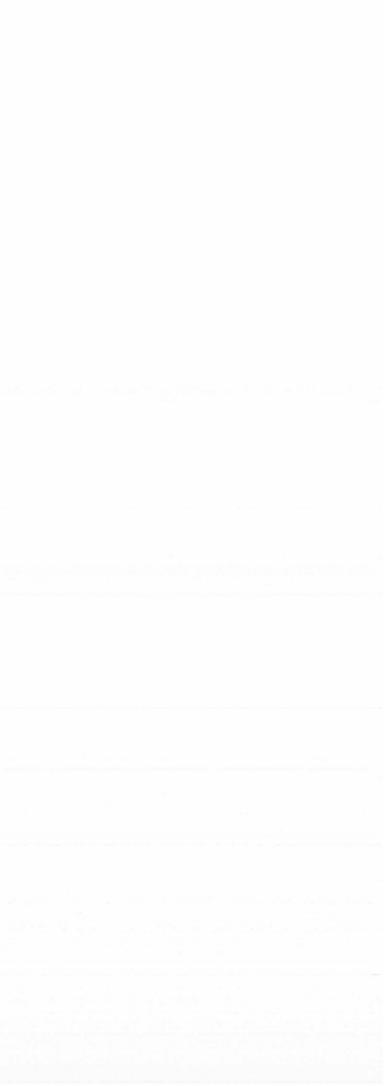

3. The vessel appears to have suspect stability/performance when under way and under load. The vessel needs to be fully surveyed by a qualified surveyor and have conditions put on its survey, like all other commercial ridged inflatable dive boats in the industry.

The vessel also needs to be operated by a person who holds a commercial manning certificate as the vessel is carrying paying passengers and is over 6 metres. This will put a qualified person behind the helm as master of the vessel and this would eliminate the problem of who is perceived to be in charge of the vessel.

	7	
Q19	"What was the purpose of the journey?"	
Α.	"Dive trip."	
Q20	"What time did you commence your journey?"	
A.	"About 8 or 9 in the morning."	
Q21	"Was anyone injured in the incident?"	
Α.	"No"	
Q22	"Was there any damage to the vessel?"	
Α.	"Yes, oh yes."	
Q23	"What type of damage?"	
Α.	"The canopy smashed the windscreen, all the instruments."	
Q24	"Is the vessel insured?"	The stand
Α.	"Yes"	2 Com
Q25	"Do you know who with?"	10 <sup>1</sup>
A.	"No"	
Q26	"How many trips have you done with the club in that vessel?"	
A.	"Half a dozen."	
Q27	"Do you pay club membership?"	
A.	"Yes"	
Q28	"How much is that?"	
A.	"100 bucks a family."	
Q29	"Do you pay to use the vessel each time?"	
Α.	"I don't really pay to use it as such."	
Q30	"What does your membership money pay for?"	
А.	"I don't know."	

Π

Q31	"Do you ever pay for fuel or anything else to do with the vessel?"
Α.	" No, just dive ticket."
Q32	"How much does a dive ticket cost?"
Α.	"That varies, It depends, between 10-15 dollars, depends on how many tickets you buy."
Q33	"How many tickets would \$10 get you?"
Α.	"One"
Q34	"What does that one ticket entitle you to?"
Α.	"To go out in the boat and Driver."
Q35	"Was there a list of persons who were present on the 11 September 1999 at the time of the incident?"
Α.	"Yes, there was a list."
Q36	"What relationship to the persons that go on the trip?"
Α.	"Just club members."
Q37	"Was any other equipment lost in the incident?"
Α.	"My dive computer, dive weights, papers, lost various gear."
Q38	"Who gave you permission to use the vessel?"
Α.	"The club does."
Q39	"Are these trips pre planned?"
Α.	"Oh yeah."
Q40	"What qualifications do you hold to drive a vessel?"
Α.	"Recreational Ship Master's Licence."
Q41	"How long have you held the licence?"
Α.	Sch.4 Part 4 s.6 Pl

"Do you hold a speed boat driver's licence?" Q4

"Yes," (sighted

- "How long have you held the speed boat driver's licence?"
- Q6 "Do you remember the marine incident which happened off Flinders Beach on North Stradbroke Island on 11 September 1999 which involved a Rigid Inflatable Boat being swamped?"
- Α. "Yes"
- Q7 "Were you on board that vessel?"
- Α. "Yes"
- Q8 "Are you the owner of the vessel?"

		11
	٨	"No"
	A.	
	Q9	"Who is the owner?"
	Α.	"Underwater Research Group of Queensland."
	Q10	"How did you come to be on the vessel on 11 September?"
	Α.	"Club dive weekend."
	Q11	"Who is the owner of the club?"
	Α.	"Private members club, not for profit."
	Q12	"Are you a member of the club?"
	Α.	"Yes"
	Q13	"How long have you been a member of the club?"
	Α.	
	Q14	"Do you hold a position in the club?"
	A.	"Not presently."
	Q15	"How much does it cost to be a member?"
	A.	"\$60 a year, annual fee."
	Q16	"Is there any other money paid to join?"
	A.	"Yes, \$15 joining fee."
į	Q17	"What does that \$60 annual fee pay for?"
i	A.	"Just the right to attend the club, go on dives and outings."
)	Q18	"Have you seen this marine incident form before?"
	A.	"No"
3	Q19	"Did you hel <sup>goh.4 Part 4 s.6</sup> fill out this form?"
1	A.	"No"

П с П П П

	12	
Q20	"Just by looking at this form, is it a true and correct report of what happened on 11 <sup>th</sup> September?"	
Α.	"Yes"	
Q21	"Who is the director of the club?"	
Α.	"No directors, it is private."	
Q22	"Is there a President?"	
Α.	"Yes"	
Q23	"Who is the president?"	
Α.	Sch.4 Part 4 s.6 PI	
Q24	"Who was in charge of the rigid inflatable boat on the day of the incident?"	
Α.	"Whoever is a licensed driver. The group as a whole."	
Q25	"Who was in charge of the vessel at the time of the incident?"	n Off
Α.	was the licensed driver."	
Q26	"Wasunder directions from you?"	
Α.	"He was under observation. He was licensed driver and was under observation by me. I was standing to the right. Under club rule I have authority to take over if the vessel's not competently handled."	
Q27	"Were you giving any instructions prior to the incident taking place?"	
Α.	"We were talking about line of approach and the gutters."	
Q28	"Wasasking any type of directions or assistance from you prior to the incident?"	
Α.	"Only when approaching for a line of approach."	
Q29	"How would you describe your ability to operate the 6.4 metre rigid inflatable boat?"	
A.	"I am an experienced driver."	

 $\Pi_{\bigcirc}$ 

]

Q30	"How many times have you operated the rigid inflatable boat in
	a surf zone?"

- "A lot, heaps of times." Α.
- Q31 "Are you familiar with the area the incident happened?"
- "Yes, I've been in and out of it six times." Α.
- "Can you describe the incident in your own words?" Q32
- ueach." "Yep,<sup>Sch.4 Part 4 s.6</sup> Ptook the boat from the beach out through the A. gutter. There was probably 1 metre surf and out to Flat Rock, completed the dive and drove back with a following sea, probably winds fresh and a little to 12-15 knots and he landed up alright and got on the back of the wave and you could see the waves banking on the beach on the outer sand bar which formed the gutter. The wave dropped away and another wave came through and picked the boat up to about 45° and put the noose under water. The boat filled with water and the next one rolled the boat and everyone got thrown out and I got caught under most momentarily. There was one other person under with me. Nobody was injured and we swam into the beach."
- Q33 "Was there any damage done to the vessel?"
- "Top super structure, the canopy and electrics, we saved the Α. motor."
- Q34 "Was any gear lost?"
- "Not substantial, all weight belts." Α.
- "What speed were you doing prior to the incident? Q35
- "4-5 knots, the speed of the wave," Α.
- "How many passengers were on board?" Q36
- "Eight all up, but 9 possibly." Α.
- Q37 "How much dive gear was on board?"
- "8 tanks, 8 Regs, 8 masks, 8 weight belts." Α.
- Q38 "Where were the passengers sitting prior to the incident?"

Α.	"The driver stood up, me to the right, one passenger left, one either side of the console, forward sitting on the console. The rest aft on the tubes."	
Q39	"What relationship were the passengers to you?"	
Α.	"Club members."	
Q40	"What was the purpose of the journey?"	
Α.	"Club dive trip."	
Q41	"Was it a training trip in any way?"	- MULL
Α.	"No"	
Q42	"Do you hold any qualifications to train people?"	
Α.		
Q43	"Is the club an authorised training provider?"	
Α.	"The club provides no form of training."	
Q44	"Were you doing any research during the trip?"	<i>2</i>
Α.	"No"	
Q45	"Who pays for the fuel in the vessel?"	
Α.	"The club."	
Q46	Sch.4 Part 4 s.6 PI told me about a dive ticket you can buy, can you explain that?"	
Α.	"You make a donation."	
Q47	"Is there a set donation one ticket would cost?"	
Α.	"No, it is based on how many donations you made."	
Q48	"And what does the donation get you?"	
Α.	"The right to use the boat or be on the boat in the future ??, also maintenance, it is cost recovery, we use the ticket as proof they have made a donation."	
Q49	"Is the club run at a profit?"	

Α.	"No, any surplus is used to replace the vessel."	
Q50	"Who gives you permission to use the vessel?"	
Α.	"The club has policies and procedures and a list of authorised drivers with areas they can operate. The committee delegates the boat captain and dive captain."	
Q51	"Is the boat captain in charge of the vessel when it is taken out on a trip?"	
Α.	"No, it depends."	
Q52	"Are the authorised drivers in charge of the operation of the vessel?"	
Α.	"They might be, they might not. There must be an authorised driver present when the person driving the vessel is not authorised by the club, whether they are licensed or not."	
Q53	"Bgh.4 Part 4 s.6 Pan authorised driver with the club?"	The line
Α.	"No"	
Q54	"Have you ever had to fill out a marine incident form before?"

135-04877.pdf - Page Number: 48 of 66

#### What has happened?

A 6 metre aluminum boat bearing registration number s missing.

#### When did it happen?

The vessel departed at 0600 hrs 27 July 03.

#### Where has it happened?

The vessel departed from Point Lookout, North Stradbroke Island.

### Who is involved? (e.g. individuals/companies/government agencies/Members of Parliament)

The occupant/s of the vessel - unknown to MSQ at this stage.

### What action has been taken by Maritime Safety Queensland?

The water police has commenced search and rescue operations./

## Memorandum

Queensland Transport

**Maritime Safety** 

Queensland

Our ref 720/00994 Your ref Date 26 August 2004

Mr Kumar FERNANDO Acting Manager Marine Safety

Subject Vessel – collided with Flat Rock off Point Lookout on 2/5/04

Investigating Officer E.J. MORAN MSO PBP 33272

On the 17 August 2004 I was directed by Mr Kumar FERNANDO acting manager marine safety to attend to follow up investigations in relation to a marine incident which occurred at 2050 hrs on the 2 May 2004. The incident was initially investigated by the Brisbane Water Police and they recommended that no further action will be required by that agency.

On the 26 August 2004 I contacted the master/ owner of the vessel Sch.4 Part 4 s.6 Pl who permanently resides at

## Incident

To

stated that he was proceeding north approx 3 nautical miles east of Point Lookout alone on his vessel \_\_\_\_\_\_ which is a 10 metres sailing yacht with New South Registration No \_\_\_\_\_\_ He stated that sailing conditions were good with light westerly winds, full moon and good visibility.

He stated that at about 2050 hrs he heard an unfamiliar sound coming from the engine bay and he put the vessel on auto pilot and went below to investigate. He stated that from the heading he had set on his auto pilot his vacht should have missed flat rock by half a mile.

He stated that he was below for a period of approx 5 minutes as the source of the noise was difficult to locate and whilst he was below he felt his yacht bump into something. He immediately returned to the weather deck and on arrival he noticed that Flat Rock was extremely close and he was sailing past the rock.

stated that he then inspected his vessel externally with the aid of a torch and noticed minor hull damage to the starboard side. He stated that his vessel had taken a small amount of water onboard and this entered through the stern gland.

> Enquiries Telephone +61 7 Facsimile +61 7

was then towed to Manly Harbour and then continued his voyage to Mooloolaba where he had the ship slipped and effected repairs to the fibreglass. The total cost of repairs including slipping, three days hard stand and fibreglass repairs was \$990:00. stated that he was not injured during the incident.

#### Conclusion

Sch.4 Part 4 s.6 Plis a master with many years experience sailing his private yacht in open waters. He stated that he was aware of the location of Flat Rock from previous voyages.

The course plotted by should have enabled his yacht to past Flat Rock at a distance of approx. half a mile.

The source of the noise emanating from the engine bay was difficult for to locate and this required him to remain below longer than expected.

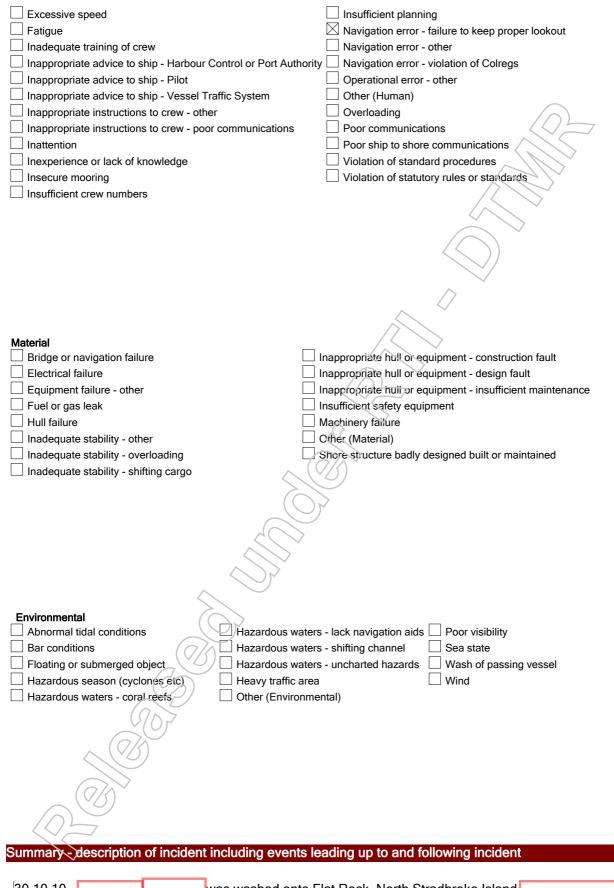

The light westerly breeze would have pushed the yacht side ways and subsequently causing it to collide with Flat Rock.

#### Recommendations

appeared to take all possible action to plot a course on his auto pilot that would allow his yacht to past Flat Rock safely while he was below. It is possible that a wind gust had pushed his yacht side way on a collision course with the rock. I recommend that no further action be taken and the matter filed.

E.J. MORAN Marine Safety Officer

## Memorandum

Queensland Department of Transport Our Ref: 97086 Your Ref: Date: September 16, 1997

## TO: Capt. J Littleton A/RHM Brisbane

SUBJECT: Flat Rock, Point Lookout

I wish to report that over the last nine months there have been three similar but separate incidents in the vicinity of Flat Rock, Off Point Lookout, N Stradbroke Island.

Two have resulted in the capsizing of the craft involved, with one vessel being sunk and not recovered. There have luckily been no injuries or loss of life.

The Incidents themselves were:-

30/12/96 - RIGID TOO - A dive boat operated by Stradbroke Island Scuba which fell the crest of a very big freak wave.

22/2/97 - A 7m Recreational half cabin cruiser which was swamped and sank by a very big wave.

16/8/97 - NAIAD DIVE - A rigid inflatable dive boat operated by Stradbroke Island Scuba capsized by a big freak wave

It is noted that all incidents occurred with clear weather, E-SE'ly winds 5-15 knts, and with a FALLING TIDE. The lack of keeping a proper lookout also was an attributary factor in all cases.

As an aid to help educate mariners who frequent this area it is suggested that a warning notice be incorporated on the Queensland Boating and Safety Chart Southport-Caloundra. The notice highlighted in Red would be on the dangers of encountering freak waves in the vicinity of Flat Rock, especially on a falling tide

SUBJECT:	"NAIAD DIVE", Capsizing, Flat R	ock, Off Point Lookout 15/8/97
	Investigation Repo	ort
This incident of inflatable dive v	ccurred at about 11:00 hrs on the morning vessel "NAIAD DIVE" capsized off Flat	ng of 15th August 1997 when the rigid t Rock, Point Lookout.
This investigation 1) The NA	on has found that:- MAD DIVE is a Class 2D rigid inflatabl ba Centre, Point Lookout.	
2) The ves	ssel was on a trip to check on the sea wa	ter visibility.
3) The ves before doin	sel anchored to the East of Flat Rock af	ter looking around at the weather etc
4) The weat and a fallir	ather at the time was good, calm sea, lig	ht winds from the SE, good visibility
5) Having	just anchored the vessel was swamped a	and capsized by a large swell.
6) The four	r people were assisted by the crew of tw	o boats fishing near by.
7) The larg and not tho	e swell appeared to affect on the dive be se vessels fishing to the south of it	oat anchored to the east of the rock
Determination.	ADF	
The cause cause and that the keep ne sea and swell	of the accident appears to the freak way bing of a lookout would have avoided the	e. Having just anchored it can not be ne incident. The vessel anchored into
