

Ipswich Motorway Upgrade: Ipswich/Logan Interchange

Project overview

Note: This is a draft design and is subject to further change. Design current as at February 2007.

This \$255 million project is part of the Australian and Queensland Governments' commitment to providing better infrastructure for a growing community and improving safety and traffic flow on the Ipswich Motorway. Work will include upgrading the Ipswich/Logan Interchange and a 2km stretch of the Ipswich Motorway between Goodna and Gailes. Construction for the Ipswich/Logan Interchange project will take about two years, finishing in early 2009.

New design features

Since consulting with the community in 2005 some minor changes have been made.

- » The Ipswich Motorway ramp to the Logan Motorway will now run underneath the Ipswich Motorway.
- » The Logan Motorway ramp to the Ipswich Motorway will now run underneath the off-ramp to Gailes and Goodna.
- » The service road intersections at Old Logan Road and Newman Street have been further developed to include a bridge structure closer to Newman Street so they are safer and easier to use.
- » The design has been updated so that the interchange is compatible with a Goodna Bypass

Benefits to the community and motorists

- » Improved safety
- » Helping to improve travel time on the Ipswich Motorway
- » Improved local access across the Ipswich Motorway
- » Safer and improved access for pedestrians and cyclists
- » Improved landscaping and planting of native trees.

Thank you for your cooperation during these essential works.
