

Pacific Motorway Upgrade, Springwood (south) to Daisy Hill

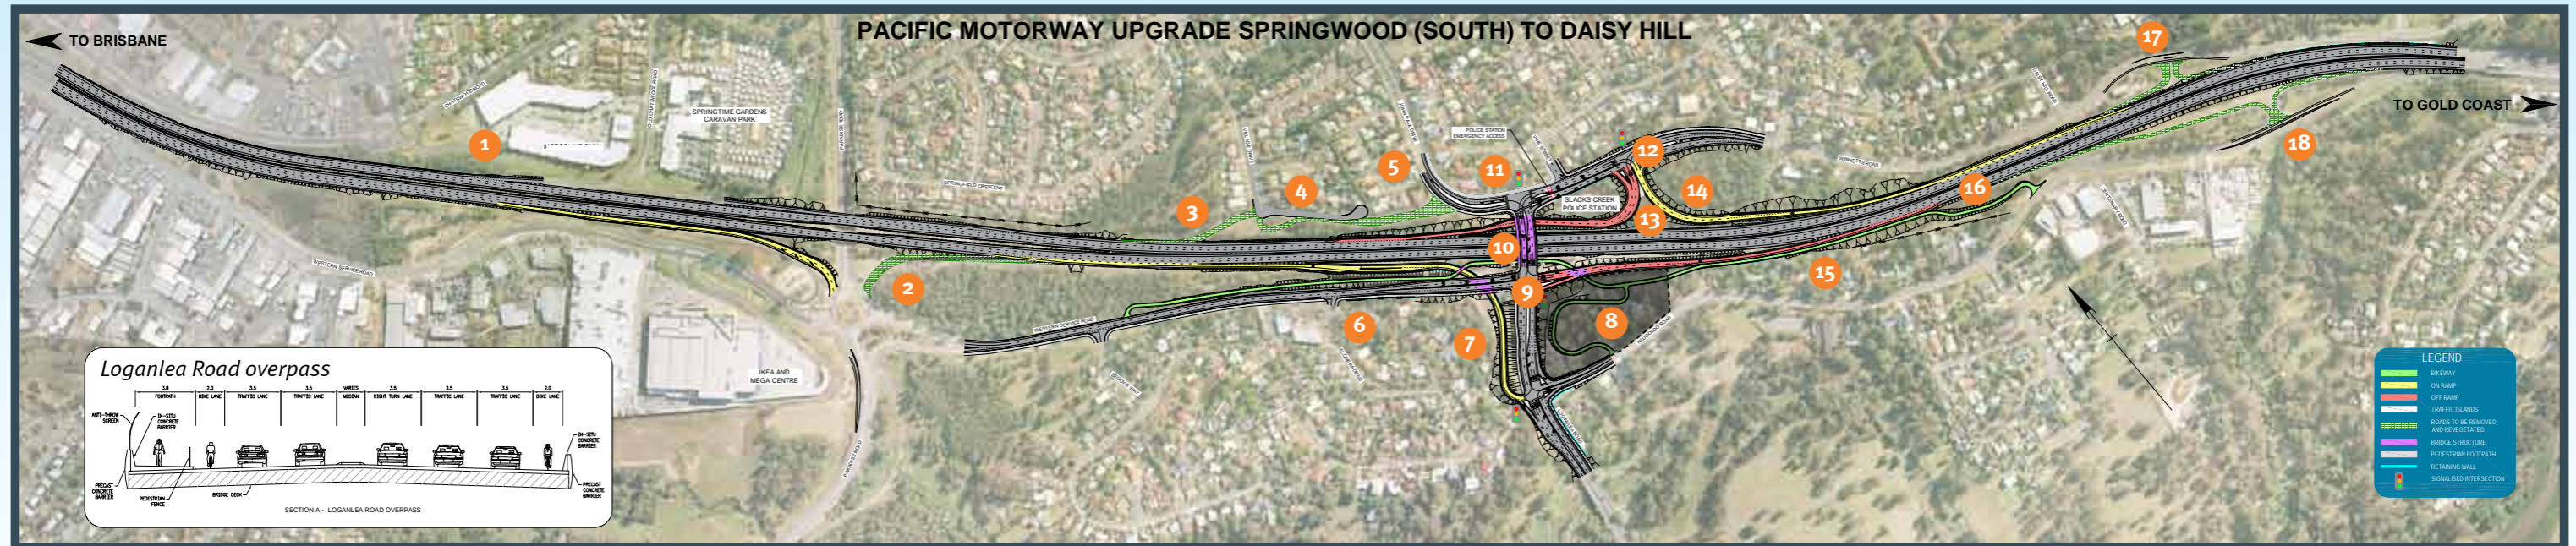

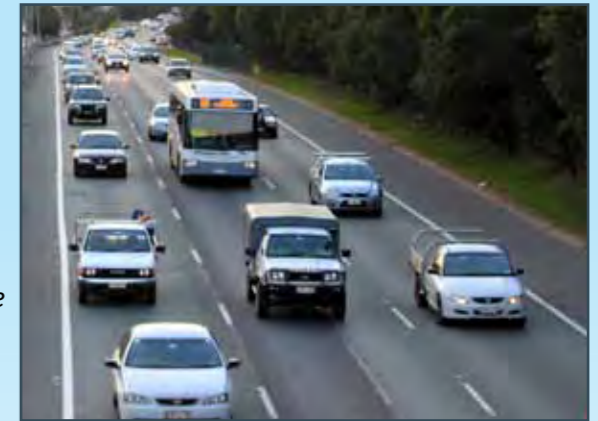

The Pacific Motorway Upgrade, Springwood (south) to Daisy Hill will improve access, traffic flow and safety for the 140,000 motorists who travel this route every day. Works include rehabilitating the motorway with provision for future lane upgrades to preserve and maintain the road network for the next 20 years

The upgrade to the Loganlea Road interchange with improvements to on and off ramps will improve safety and local access to the motorway for the Logan community. A new five-lane overpass with provision for cyclists and pedestrians will be built to replace the existing two-lane Loganlea Road bridge.

The project includes a bus stop with park 'n' ride facilities to encourage smart, sustainable travel options. The department has consulted with TransLink to determine Loganlea Road as the best location for the facility, to deliver the greatest access routes and travel benefits to the local community.
