

Road reconstruction – Lockyer Valley and Ipswich regions

The Department of Transport and Main Roads is undertaking road reconstruction works in the Lockyer Valley and Ipswich regions as part of Operation Queensland.

Operation Queensland is the largest reconstruction effort in Queensland's history, rebuilding communities, fixing infrastructure and restoring regional economies after recent flooding and cyclone events.

As a result of these events, more than 100 kms of the road network throughout the Lockyer Valley and Ipswich regions were damaged in some way. This damage ranged from potholes to major embankment slips and some roads being completely washed away.

This \$478 million program of works is being delivered under the Natural Disaster Relief and Recovery Arrangements (NDRRA), a joint federal and state initiative.

Under these arrangements, the Australian Government provides 75% of the funding, with 25% from the Queensland Government.

The reconstruction works will be undertaken in the Lockyer Valley and Ipswich regions within the next three years.
