

Bruce Highway Upgrade

Caloundra Road to Sunshine Motorway

Steve Irwin Way, Glenview Temporary lane closures

Construction notice

May 2018

Ref: CN28

Intersection realignment works will commence on Steve Irwin Way adjacent to the Jowarra Park rest area and Mooloolah Cemetery from mid-June until late September 2018.

During this time approximately 600m of Steve Irwin Way westbound from Mooloolah Cemetery will be reduced to one lane in both directions of travel.

Lane closures are required to undertake works in the centre median including drainage and early works on a fauna crossing.

The realigned intersection will link to the new western service road. These works are in preparation for the reconfiguration of the Caloundra Road interchange as part of the Bruce Highway Upgrade – Caloundra Road to Sunshine Motorway. The work zones are shown on the map overleaf.

Vegetation removal

Vegetation removal will continue along sections of Steve Irwin Way both eastbound and westbound before the Caloundra exit. These works are required as part of the intersection realignment and to allow space for access tracks for service providers.

Fauna spotters will monitor the vegetation removal works to ensure wildlife is protected and if required, relocated.

Transport and access

Bus services including routes 605 and 615 will continue to run during the works. Please continue to use the temporary bus stop located 70m from the permanent bus stop on Steve Irwin Way near Mooloolah Cemetery.

Access to the Mooloolah Cemetery and Jowarra Park rest area will be maintained during the construction period. Active transport for cyclists will also be maintained during works.

Working hours

Both day and night works will be required to complete these works.

The project's working hours are:

- **Night works:** Sunday to Thursday, 7pm to 5am.
- **Day works:** Monday to Saturday, 6am to 6pm.

The works are expected to be completed over a three to four month period, weather permitting.

It is important to note that these activities are dependent on weather conditions.

What to expect:

- **Audible noise:** Heavy machinery, including chainsaws will be in use during working hours and nearby residents and businesses should expect audible noise. Grinding and mulching works will be carried out during the day to minimise impacts on nearby residents. Reversing beepers and flashing lights are a safety requirement and will be used at all times during day and night working hours.
- **Traffic control and lane closures:** Traffic changes will be in place including lane and road shoulder closures, changes to traffic flow and short-term traffic disruptions. Traffic controllers will be in place at times to assist and direct road users. The current speed of 60km/h will be maintained during the works. Access to residences and businesses will be maintained during the construction period.
- **Temporary lighting:** Generator-powered lighting towers will be used to light work areas at night.

We thank the local community for your patience and cooperation during the works.

Other upcoming construction activities:

Day works (Mon-Sat, 6am-6pm) will include:

- Vegetation removal activities.
- Ongoing major earthworks and drainage works near Sippy Creek, Cunning and Tanawha roads and the Bruce Highway median (north of the Sunshine Motorway).
- Service relocation works for electricity near Ashburton Crescent, Sippy Creek and Tanawha roads.
- Bridge piling works to commence at the Caloundra Road interchange.

Night works (Sun-Thurs, 7pm-5am) will include:

- Vegetation removal activities.
- Service relocation works for telecommunications and electricity, including temporary stoppages on the Bruce Highway between the Pignata Road underpass and the Sunshine Motorway.
- Pavement widening works on the Bruce Highway and Caloundra Road.
