The Department of Transport and Main Roads would like to advise that night works will be carried out along the eastern side of the Bruce Highway, near Leea and Ribbonwood streets, from Sunday 24 November 2019 (weather permitting).

The works will occur over one week and will involve removing vegetation as part of roadworks to upgrade the highway. Fauna spotters will monitor the vegetation removal works to ensure wildlife is protected and relocated, if required.

**Working hours**

Night works will be required to complete these activities due to the close proximity to live traffic.

The project’s working hours are:

- **Night works**: Sunday to Thursday, 7pm to 5am.
- **Day works**: Monday to Saturday, 6am to 6pm.

**What to expect**

- **Audible noise**: Heavy machinery, including chainsaws and mulchers, will be in use and nearby residents should expect audible noise. Reversing beepers and flashing lights are a safety requirement and will be used at all times during day and night working hours.
- **Traffic control and lane closures**: Traffic changes will be in place including reduced speed limits, road shoulder and lane closures, changes to traffic flow and short-term traffic disruptions.
- **Temporary lighting**: Generator powered lighting towers will be used to light work areas at night.

*We thank the local community for your patience and cooperation during these works.*
