

# Caboolture Connection Road Route Safety Strategy

## King Street intersection with George Street/Caboolture Square Shopping Centre

Project information

Proposed design  
July 2018

### Proposed safety upgrade to improve right-turns

The Department of Transport and Main Roads (TMR) is underway with design work to improve safety at the King Street intersection with George Street and the entrance to Caboolture Square Shopping Centre in Caboolture.

There have been a number of crashes occurring at this intersection when motorists attempt to turn right at the traffic signals during peak periods.

To improve safety, TMR is proposing to:

- provide dedicated signal phases for right-turns from King Street into George Street and the shopping centre
- extend the right-turn lanes on King Street to provide extra traffic storage.

Details are shown on the proposed design below.

Design work will be completed over the coming months, with construction scheduled to begin later this year.

TMR will engage with stakeholders again prior to construction works starting.

The proposed works are part of the Caboolture Connection Road (Lower King Street and King Street) Route Safety Strategy. A \$7.5 million suite of safety upgrades will be delivered along Lower King Street and King Street between the Bruce and D'Aguiar highways as part of the department's *Targeted Road Safety Initiatives Program*. The treatments aim to address the growing trend of crashes along these roads.

Safety treatments will also be designed and delivered:

- between the Bruce Highway and Dux Street
- between Dux Street and Alfred Street
- at the Lakes Centre business precinct entrance
- at the Wararba Crescent and Lynfield Drive intersections
- near Devantier Road
- at the Williams Road and D'Aguiar Highway intersections.

Construction works will roll out progressively as designs for each safety upgrade are finalised. Construction is scheduled for completion in mid-2020, weather permitting
