April 2019

We are pleased to advise that the demolition of the existing eastbound bridges over Little Doris Creek and Oxley Creek is making good progress in readiness for the construction of new higher and wider eastbound motorway bridges.

From Monday 15 April, piling night works will take place until late-July. At night we will be moving piles and pitching them into position, vertically. The piles will be driven intermittingly into the ground slightly for stability. This will be noisy, and we apologise for this. It is necessary however, for safety to secure the piles. In the morning after 7am, we will then drive the piles deep into the ground to their final position.

Please note. No piling work will be completed from 19 to 29 April, 2019.

For more information about piling works please visit www.tmr.qld.gov.au/Projects/Name/I/Ipswich-Motorway-Upgrade-Rocklea-to-Darra-Stage-1-Granard-Road-to-Oxley-Road/Piling-works.

What can I expect?

This work causes noise and some dust. Safety will be carefully managed, and specialist piling contractors will perform the works. At night, traffic may be reduced to one lane each direction for your safety. The timing of all works is subject to weather and construction conditions.

While most of the piling works will be carried out during the day between 7am and 5pm, Monday to Saturday, pile pitching night works will be required, between 8pm and 5am with the nearest lane closed as a safety buffer.

Thank you for your patience during these essential works. If you would like further information about piling works or the project, please call 1800 204 990, email contactus@r2d1.com.au or visit www.tmr.qld.gov.au/rocklea2darra.

Information about current traffic and road conditions can be found at www.QLDTraffic.qld.gov.au, by downloading the QLD Traffic app, or calling 13 19 40.
