

NIGHT WORKS

October 2016

Southport–Burleigh Road network improvement program Southern section (Fremar Street to Rudd Street)

Bridge widening works at the Albert Park lagoon bridge, between Fremar Street and Monaco Street, Broadbeach Waters, are progressing with new bridge deck units to be installed on the eastern side.

The bridge is being widened to accommodate a third traffic lane for southbound motorists

To ensure sufficient working room for works to safely be completed, installation of the bridge deck units requires lane closures on Bermuda Street. Therefore, for safety and traffic management reasons, bridge deck units must be installed at night when traffic volumes are low.

As well as minimising delays to the travelling public, completing this work at night helps to ensure a safe environment for motorists, pedestrians, cyclists, and construction workers.

Timing

The bridge deck units will be installed during night shift on:

- **Monday 24 October 2016 from 8pm to 6am**

It is important to note this work schedule depends on wet weather, contractor and other site conditions and may change without further notice.

What to expect

During night works local residents, businesses and road users can expect:

- **Audible construction noise:** Heavy machinery will be in use during the work period including construction vehicles and a crane. Other activities such as the unloading of pre-cast bridge deck units will produce audible noise.
- **Single lane closures in both directions:** Lane closures will be in place on Bermuda Street, near the work zone. One lane will be maintained in each direction while works are being undertaken. Motorists can expect minor traffic delays.
- **Changed traffic conditions:** Reduced speed limits and traffic control will be in place throughout the work zone. Road users are asked

to follow signage and take care while travelling through the area.

- **Reversing beepers and flashing lights:** These are a safety requirement and will be used at all times during work hours.
- **Georgiou will make every attempt to minimise noise where practical:** We thank you for your patience during this important road upgrade.
