**Please Note**

- The above program of works, current at 8 August 2018, is indicative only and subject to change without notice. For example, projects may be deferred without notice to respond to emerging government priorities.
- The estimated value of works to market, planned procurement method and expected time to market for the above projects is indicative only and subject to change without notice.
- The estimated value of works to market amounts are based on the estimated value of tenders that will be run and finalised in 2018-19. The values reflect expected spend on contracts in 2018-19 and, in some cases, continuing into 2019-20. The values reflect the spend on contracts with Industry rather than total project costs, noting that TMR has internal costs and past procurements that may be complete.
- For that reason, that information, presented at the project level, will be different to the information that is contained within the Queensland Transport and Roads Investment Program so a reconciliation between the two documents would not be useful.
