Notes:

- The above program of works, current at 15 August 2019, is indicative only and subject to change without notice. For example, projects may be deferred without notice to respond to emerging government priorities.
- The estimated value of works to market, planned procurement method and expected time to market for the above projects is indicative only and subject to change without notice.
- The estimated value of works to market amounts are based on the estimated value of tenders that will be run and finalised in 2019-20. The values reflect expected spend on contracts in 2019-20 and, in some cases, continuing into 2020-21. The values reflect the spend on contracts with Industry rather than total project costs, noting that TMR has internal costs and past procurements that may be complete.
- For that reason, that information, presented at the project level, will be different to the information that is contained within the Queensland Transport and Roads Investment Program so a reconciliation between the two documents would not be useful.
