Notes:

- The above program of works, current as at June 2022, is indicative only and subject to change without notice. For example, projects may be deferred without notice to respond to emerging government priorities.
- The estimated value of works to market, invitation method and expected time to market for the above projects is indicative only and subject to change without notice.
- Please be advised that the Engineering Consultant Scheme (ECS) PTD 0003-14 has been extended to 31 January 2023. The reason for this extension is to provide continuing coverage of professional engineering services while TMR establishes a new arrangement that will provide similar services to the ECS. The new arrangement is known as the Infrastructure Building Construction Panel (IBCP). All procurement processes will be undertaken via the Engineering Consultancy Scheme/Consultants for Engineering Projects/Infrastructure Building and Construction Panel with confirmation and timings decided at individual project level.
- The estimated value of works to market amounts are based on the estimated value of tenders that will be run and finalised in 2022-23. The values reflect expected spend on contracts in 2022-23 and, in some cases, continuing into 2023-24. The values reflect the spend on contracts with Industry rather than total project costs, noting that Department of Transport and Main Roads (TMR) has internal costs and past procurements that may be complete.
- For that reason, that information, presented at the project level, will be different to the information that is contained within the Queensland Transport and Roads Investment Program so a reconciliation between the two documents would not be useful.
- The above is not an exhaustive list of planning done within TMR but rather projects funded through the main TMR planning program. Additional planning projects are funded through other means such as Australian Government funding and other Queensland Government funding sources. Information on other planning projects can be sourced through the Queensland Transport and Roads Investment Program publication.
- Attached mapping provides indicative project locations. State-wide projects are not mapped.
