**Subject:** National Heavy Vehicle Registration Scheme

Hey mate, hope you are well.

As discussed with Tanya the following dot points sum up the issue:

- \* The Premier as Transport Minister signed Queensland up, not only to participate in, but also to be the host state for the National Heavy Vehicle Regulator (NHVR).
- \* The NHVR is set up to deliver red tape reduction, business growth, jobs for industry and lowered freight costs and better road safety for the community.
- \* At the upcoming Transport and Infrastructure Council meeting the NHVR is asking jurisdictions for some cash to build a regulatory platform.
- \* This regulatory platform is essential to the regulator delivering business and safety benefits to Queenslanders and nationally.
- \* Queensland, which in essence was being asked to contribute about \$15 million over three years has said no via cabinet.
- \* If the NHVR, employing 200 odd people in Queensland is rendered ineffective because its host state can't stump up spare change, it will be embarrassing for the Premier as Minister who signed onto the reform.
- \* There was assurance at a meeting with the Minister that would progress, the business case for the project is sound and it offers the opportunity to lower TMR costs over time, which makes it virtually cost neutral.

I have attached a presentation which was given to the Minister.

Thanks, Isuru Neelagama

Dear Minister of Transport, Hon Mark Bailey...Top cred to the staff at Dept. Transport and Main Roads Strathpine. I visited yesterday and they were brilliant.

I'm buying a Hyundai Elantra SR (smaller, easy tech communications and more fuel efficient than RAV4 for all the driving I do with real estate) and needed a Company Registration Number. I followed the advice of [redacted] Sch 4 CTPI [redacted] from Hyundai North Lakes and the staff at Strathpine Dept T&MR were ecstatic... smiling and cheering and I was out of there in 15 mins with my CRN! Special thanks to Chris who took care of me.

List of what docs you need to take in - \*ASIC search, \*copy Certificate of Incorporation for company, \*Drivers Licence with correct address on it and a \*Letter of authority on company letterhead that you can act on your company's behalf.

<http://www.lakeshyundai.com.au/> If you want a Hyundai, go see [redacted] Sch 4 CTPI at Hyundai North Lakes 3490 1111 and let him know I recommended you.

## Relief ahead for long-suffering Logan Motorway users

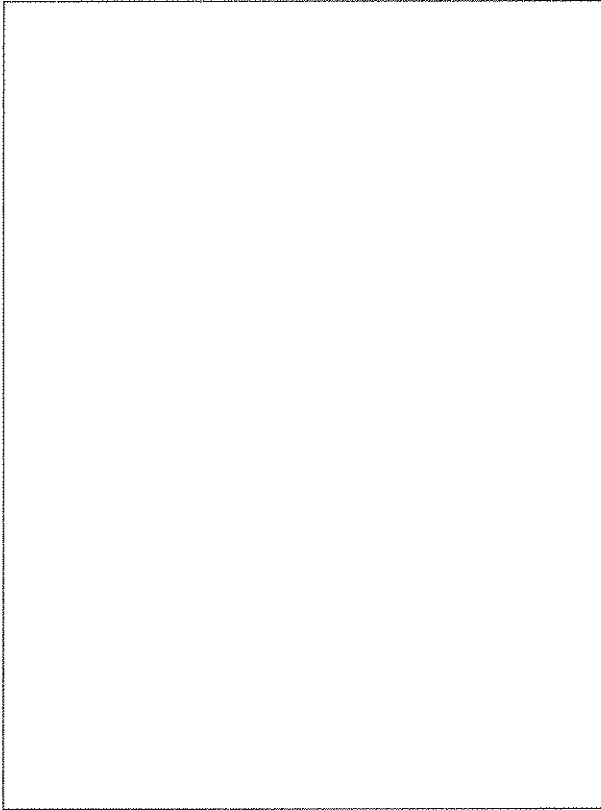

Anthony Templeton, The Courier-Mail

Subscriber only

A \$512 million upgrade to the Logan Motorway will be the first market led proposal approved by the State Government.

Released under RTI Act - TMR

The project will create 1300 jobs and includes widening some sections of the highway to six lanes in each direction.

Treasurer Curtis Pitt said the project would create jobs, reduce travel times and improve safety.

"This is a win for the local community, Queensland road users, and especially the trucking industry," he said.

"Its economic benefits are estimated to be around \$1 billion over 30 years."

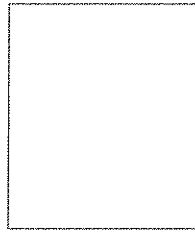

Main Roads Minister Mark Bailey said the final design of the project reflected feedback from the community and trucking industry.

"The Logan Motorway Enhancement Project now delivers greater scope and value for motorists as a result of working with stakeholders and locals," he said.

The project will be funded by Transurban Queensland, with the money recouped by higher tolls for trucks using the Logan and Gateway Motorways.

Construction is expected to start mid next year and take about two-and-a-half years.

Transurban Queensland group general manager Wesley Ballantine said disruption to motorists would be limited during construction and speed limits kept as is during working hours.

## The State Government announces upgrade of two notorious Logan Motorway entry and exit points

Michael Cormack, Southern Star

TWO notorious Logan Motorway trouble spots will be upgraded.

An underpass from Beaudesert Rd on to the Logan Motorway at Parkinson was predicted to solve a commuter headache on the busy Beaudesert Rd-Mount Lindesay Highway stretch while improvements to entry and exit points at Wembley Rd, Berrinba, would ease a renowned congestion hotspot in Logan City.

It is a \$512 million market led proposal from Trans Urban to the State Government and is due to start by the middle of 2017. It is a two-year project.

Transport Minister Mark Bailey said there would be no cost to tax payers.

An underpass from Beaudesert Rd on to the Logan Motorway at Parkinson was predicted to solve a commuter headache on the busy Beaudesert Rd-Mount Lindesay Highway stretch while improvements to entry and exit points at Wembley Rd, Berrinba, would ease a renowned congestion hotspot in Logan City.

It is a \$512 million market led proposal from Trans Urban to the State Government and is due to start by the middle of 2017. It is a two-year project.

Transport Minister Mark Bailey said there would be no cost to tax payers.

Wes Ballantine from Trans Urban said when the project was completed, the toll cost for heavy vehicles will rise from 2.6 times that of a car to three times that of a car.

Mr Ballantine explained those toll rises would fund the project.

Gary Mahon from the Trucking Association said the industry was happy to pick up the cost of the improvements given it meant less time sitting in traffic.

Mr Mahon said it was important to note the increased costs would not come until the project was finished.

The Beaudesert Rd underpass will be welcomed by Brisbane residents travelling south and attempting to turn right across two lanes of traffic heading north on the Mount Lindesay Highway.

State ALP MP for Logan Linus Power said the initial concept planning involved a traffic light design, but community consultation forced a rethink of the design and as a result an underpass would be constructed.

Running the gauntlet has been a near death defying experience for thousands of motorists but the flyover will now avoid the troubled intersection and ensure a safe passage onto the Logan Motorway.

The Wembley Rd-Logan Motorway upgrade should ease traffic congestion which, in the past, has caused significant traffic delays travelling east to west across Logan City.

Construction will see lanes on the Wembley Rd overpass doubled.

In addition, the off ramp from the Motorway to Wembley Rd will be upgraded.

The notorious roundabout leading to Illaweenah St will be removed.

**Subject:** Minister denies ethanol quota will push up prices

I asked Daryl for a right of reply and gave pre-approved quotes. Here's his story.

<http://www.couriermail.com.au/news/queensland/mandated-ethanol-quota-to-pump-up-fuel-cost-from-january-1/news-story/da1d8ba032ee8dbf03e41792555d06ef>

## Minister denies ethanol quota will push up prices

EXCLUSIVE Daryl Passmore, The Courier-Mail

November 30, 2016 12:11pm

MINISTER for Biofuels Mark Bailey has dismissed warnings that an ethanol mandate will hit motorists in the hip pocket.

Australian Competition and Consumer Commission chairman Rod Sims yesterday said Queensland drivers could face higher costs following the introduction of the new rules for more environmentally-friendly fuels from January 1.

A study showed that many motorists have switched to more expensive premium 95 or 98 petrol after a similar mandate was introduced in New South Wales because regular unleaded was harder to get.

The ACCC research estimated drivers had forked out between \$75 million and \$85 million extra as a result.

ACCC chairman Rod Sims said: "It's hard to believe we will not see a fair bit of that in Queensland."

But Mr Bailey is confident it won't happen here.

 <http://cdn.newsapi.com.au/image/v1/22e92ce0802aa8a6ce46b370da62ff64?width=316>

The report noted regulatory costs related to the incoming mandate were already keeping fuel prices high in Queensland.

"Queensland's biofuels mandate is different to New South Wales," he said.

"Our ethanol mandate from January 2017 is set at a level that will ensure fuel retailers continue to offer a broad range of fuel grades. This means that at service stations selling E10, most will continue to sell regular unleaded and premium fuels as well.

"This gives motorists more access to cleaner sources of fuel, while maintaining choice at the bowser."

The Queensland mandate will require service stations to ensure that at least 3 percent of total sales of regular unleaded petrol and ethanol-blended fuel sold is bio-based such as E10. The level will rise to 4 percent a year later.

The New South Wales mandate is 6 percent.

Mr Bailey said the Palaszczuk Government had learned from mistakes made by their southern counterparts who failed to roll out a consumer education campaign ahead of introducing the mandate, leading to confusion.

"In New South Wales, motorists wrongly assume that their car can't use E10 and instead pay more for premium fuels because the NSW government did not roll out a dedicated consumer education campaign," he said.

More than 257,000 searches had already been made on the online E10 OK checker by Queensland drivers to see if their vehicles were compatible for E10 fuel.

"By supporting the use of biofuels we have an opportunity to drive jobs growth in regional Queensland and add value to the State's abundant agricultural resources such as sugar cane," Mr Bailey said.

The ACCC report noted regulatory costs related to the incoming mandate were already keeping fuel prices high in Queensland.

Brisbane already has higher petrol prices than Sydney, Melbourne, Adelaide and Perth.

Geoff Trotter, general manager of price-monitoring agency Fueltrac, said the ethanol mandate would bring even more pain at the pumps.

"If Queensland thinks this won't happen here, well, let's not kid ourselves," he said.

Mr Trotter said service stations would have to replace pumps and tanks with E10.

"So if you are forced to sell E10 and lose some pumps, what do you think the service station will do? The answer is leave as many premium fuel pumps in place as you can because the oil company and dealer make almost twice as much profit on premium fuels as they do on ULP and the mug motorists pay an extra 10 to 20 cents per litre more at the pump."

Analysis for the Independent Pricing and Regulatory Tribunal by University of Texas researcher Michael Noel found that E10 was rejected “en masse” by NSW motorists.

He put the additional consumer cost at \$300 million for the first five years.

RACQ spokeswoman Renee Smith said they expected the impact here would be less because Queensland’s target was half that of NSW.

But she added: “We’ll be monitoring it closely to ensure there is still choice for Queensland motorists at the bowser.”

**Subject:** Social media response RE Ipswich Motorway Upgrade

Hi Min,

Please see attached advice received from TMR. In short they've suggested the following social media response:

Tenders have been called for the project's design and construct contract. Rest assured TMR will work with the proponents to maximise connectivity along the northern service road and the underpass at Oxley Creek. By contract award in the first half of 2017, TMR will have the active transport solutions finalised. If you require further information, please call 1800 204 990.

Happy to go back for more info if needed.

Regards

## Southeast Qld energy prices set to go down

Consumers in southeast Queensland will watch their power bills fall by \$100 on average next financial year, bucking the national trend of rising energy prices.

The deregulation of the energy market, coupled with the decreases in the Solar Bonus Scheme mean southeast Queensland energy prices are set to fall by 1.5 per cent annually on average over the next two years, according to the Australian Energy Market Commission (AEMC).

The average annual bill of \$1370 for the current year is predicted to fall by almost \$100 next year before a slight increase again to \$1330 by 2018/19.

Tasmania is the only other state expected to experience a fall in prices, with NSW and Victoria both predicted to increase by about four per cent.

Prices are rising nationally due to the closure of the Hazelwood power station in Victoria, but the decrease in the cost of the Queensland's solar bonus scheme more than offsets the impact on Queensland consumers.

Ultimately though, individual households and how they use energy will be the main factor in prices.

"No two households use energy in the same way. Knowing how much power you use and when, will be the key tool in controlling electricity costs in the future," AEMC Chairman John Pierce said.

### Karen Masnata Memorial Scholarship

Today at 1:28 am

Tuesday 17 January 2017

I'm pleased to announce the Karen Masnata Memorial Scholarship, named in memory of Karen Masnata, our former Energy DDC, and a valued and respected leader of the department.

This scholarship will provide financial support for an employee to showcase their technical excellence and enhance their capability in their field, through accessing professional events and programs.

It is one year since we lost Karen to cancer, and she is sorely missed. It is our hope this prestigious scholarship will continue her legacy and do justice to her influence on the people and policies of the department.

The scholarship will be awarded to one applicant on a biannual basis and has a maximum value of \$30,000. It aims to reinforce outstanding performance that advances our vision and values, and provides additional recognition for an individual demonstrating continued excellence in their field of expertise.

All DEWS staff are welcome to apply. You'll find information, including the application form and terms of reference on our [intranet](#). Applications close Thursday 16 February.

Response: (Please attribute to a Transport and Main Roads spokesperson)

The safety of all road users is our top priority.

We investigate every fatal crash on a state-controlled road.

The posted speed limit for the Capricorn Highway was reduced to 80km/h (from 100km/h) in 2007-08 in recognition of traffic volumes at the intersection.

The approach speed on Anakie-Sapphire Road (Sapphire leg) reduces from 100km/h to 60km/h in the lead-up to the intersection, accompanied by "Reduce Speed" warning signage.

The approach speed on Anakie-Sapphire Road (Anakie leg) reduces from 70km/h to 60km/h in the lead up to the intersection.

We are working with Queensland Police Service to finalise the investigation into the crash on the Capricorn Highway in December 2016.
