Configuring the TMR 12d Customisation V11

72 TMR 12d Customisation V11.2.2 (Ext)			
This self-extractor contains the TMR 12d Customisation for external use. Customisation Folder 'V11.2' will be created, or updated if existing. Extraction path:			
C:\SharedData\Apps\TMRCust\12d			
OK Cancel			

The customisation content is packaged as a self-extracting zip (TMR 12d Customisation V11.2.2_Ext.exe). The default extract path is 'C:\SharedData\Apps\TMRCust\12d\'

The zip file contains the TMR 12d Customisation starting at the folder 'V11.2'

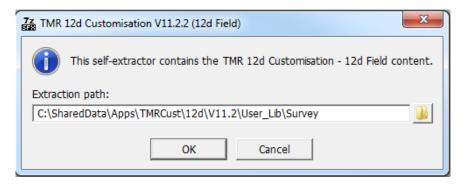

If a different extract path is used for the customisation then there are several files in the customisation that contain paths that will need modifying. You can use the program 'TMR_Configure_12d.exe' to perform this operation.

Run '....\11.2\TMR_Configure_12d.exe' to perform the following actions as required:

- Perform a search and replace on selected files to reflect the extraction path if different from the default.
- Update the environment variable AUTHORIZATION_4D in 'User\env_default' to set the location to your 12d licence file.
- Create a shortcut on the desktop to launch 12d Model V11 against the TMR 12d Customisation.
 TMR 12d customisation for V11

Configure TMR 12d Customisation Location			
Configuration file:			
E:\TMRCust\12d\V11	1.2\Config_file_list.xml		
Search string:	C:\SharedData\Apps\TMRCust\12d\V11.2		
Replace string:	E:\TMRCust\12d\V11.2		
Change file list:	Configure TMR 12D Customisation		
User\env_configs.4d User\env_default.4d User\env_startup.4d User\plotters.4d User\srv_defaults.4d User\srv_defaults.4d User\srv_plotters.4d User_Lib\IP_Output\S	Number of replacements: 62 User\env_default.4d > AUTHORIZATION_4D updated with location of licence file Shortcut 'TMR 12d customisation for V11' created on desktop.		
Set 12d licence file loc	ation:		
☑ Create Desktop Sł	hortcut Cancel OK		

Optional download and install of 12d Field Customisation content.

The Extraction Path should be the 'Survey' folder within the Customisation.
