## Configuring the TMR 12d Customisation V12

TMR 12d Customisation V12.1.0 (Ext)	x		
This self-extractor contains the TMR 12d Customisation for external u Customisation Folder 'V12.1.0' will be created, or updated if existing Extraction path:			
C:\SharedData\Apps\TMRCust\12d			
OK Cancel			

The customisation content is packaged as a self-extracting zip (TMR 12d Customisation V12.1.0\_Ext.exe). The default extract path is 'C:\SharedData\Apps\TMRCust\12d\'

The zip file contains the TMR 12d Customisation starting at the folder 'V12.1.0'

If a different extract path is used for the customisation then there are several files in the customisation that contain paths that will need modifying. You can use the program 'TMR\_Configure\_12d.exe' to perform this operation.

Run '....\V12.1.0\TMR\_Configure\_12d.exe' to perform the following actions as required:

- Perform a search and replace on selected files to reflect the extraction path if different from the default.
- Update the environment variable AUTHORIZATION\_4D in 'User\env\_default' to set the location to your 12d licence file.
- Create a shortcut on the desktop to launch 12d Model V12 against the TMR 12d Customisation.

TMR 12d customisation for V12.00

Configure TMR 12d C	Customisation Location	
Configuration file:		
E:\TMRCust\12d\V12	2.1.0\Config_file_list xml	
Search string:	C:\SharedData\Apps\TMRCust\12d\V12.1.0	
Replace string:	E:\TMRCust\12d\V12.1.0	
Change file list:		
User\env_configs.4d User\env_default.4d User\env_startup.4d User\plotters.4d	Configure TMR 12D Customisation	x
User/report_templates User/srv_defaults.4d User/srv_plotters.4d User_Lib/IP_Output/s	Shortcut 'TMR 12d customisation for V12.00' created on deskto	p.
Set 12d licence file loc	cation:	
☑ Create Desktop S	Shortcut Cancel OK	

Optional download and install of 12d Field Customisation content.

The Extraction Path should be the 'Survey' folder within the Customisation.
