

Personalised Transport Security Camera Status Lights

(06.22)

Approved Security Camera Systems

The following security camera systems are approved by the Department of Transport and Main Roads (TMR):

1. Mark 5 TaxiCam (VerifEye/Lytx)
2. SnapShot Mark 4 with internal camera model PV3006-001 (MTData/MTI)
3. SnapShot Mark 4 with internal camera model PV3006-002 (MTData/MTI)
4. TaxicamHD Mobile CCTV System (Taxicomms)
5. Streamax (G60DT) X5-Lite
6. Streamax (G60DT) X5-Lite V2
7. Streamax (G60DT) X5-Lite Mini
8. 13CABSi (Taxitech)
9. Crown Cabs Camera Mark 1

Notes:

- Only approved security cameras in a personalised transport vehicle may face inwards to record the driver or passengers while a personalised transport service is being provided.
- Externally focused forward or rear facing cameras are allowed in all personalised transport vehicles, however, these cameras must not record images or audio of persons inside the vehicle. Camera specifications and the download of images from these cameras are not regulated by TMR.
- If a security camera system is faulty, it is the operator's responsibility to inform TMR that the system is not fully operational and to arrange for the system to be fixed or replaced. A [Fault Notification Form](#) (F4760) must be sent to TMR and kept in the vehicle while the system is not operational. The fault notification form is valid for four days following the latter of either the date TMR is informed or the start date provided on the notification.

The following information aims to help identify the operational status of an approved personalised transport security camera system using the visual indicator lights. Further information regarding the personalised transport security camera scheme is available [here](#).

Mark 5 TaxiCam (VerifEye/Lytx) SnapShot Mark 4 (MTData/MTI)

The camera system is not fully operational if the visual indicator status light display is:

-  Blinking Red; or
-  Red and Green
-  Not illuminated (no light)

Verifeye

MTData/MTI

TaxicamHD Mobile CCTV System (Taxicomms)

The camera is working properly and recording when both the power and recording LED lights are lit green.

When the camera is asleep the recording light will not be lit. It will take up to 30 seconds for this to become lit after the vehicle ignition is turned on.

If no LEDs are lit the power maybe disconnected.

If an Error LED is lit RED or the Record LED is amber a fault may have occurred.

Streamax systems

Streamax (G60DT) X5-Lite

Streamax (G60DT) X5-Lite V2

Streamax (G60DT) X5-Lite Mini

Indicator Light	Meaning
POW	Power light
REC	Indication that the unit is recording footage
HDD	Indication that the HDD is working correctly
ALM	An alarm is triggered
VIDEO	Video loss (camera is no longer displaying video)
ERR	Error with the system or camera

13CABSi (Taxitech)

Indicator Light	Meaning
POW	The unit has power
REC	The unit is recording footage
HDD	The HDD is working correctly
ALM	An alarm has been triggered
VIDEO	Video loss (Camera has not been detected)
ERR	Error with the system, GPS or camera

Crown Cabs Camera Mark 1

If the MDVR system is correctly working, 'PWR', 'REC' and 'HDD' lights should always be lit.

PWR - Green Light
 REC - Orange Light
 HDD - Orange Light

Camera missing (video loss) - VLOSS and ALM to stay flashing.

GPS (no signal) - Err to stay flashing.

System fault (the cameras have stopped recording to hard disk) - Err to stay flashing, HDD off, REC off.
