NOTES:
1. Unique pole identification numbers are included on the project specific drawings.
2. Ensure pole surface where labels are to be applied is clean and dry.
3. Locate pole identification label on centre of the pole facing towards the traffic flow at the height specified.
4. Do not fix pole identification label across the central weld of the pole.
5. Where the lighting is traffic signal, mount the 443 label immediately above the pole identification number, ensuring the pole so as to be visible from all sides.
