ASSEMBLY SEQUENCE FOR ESCUTCHEON/ENCLOSURE EARTH

1. Terminal box cover frame M6 bolt
2. Cable gland
3. M6 washer Bellville 304 stainless steel
4. M6 nut
5. Escutcheon/enclosure

FIXING OF GLAND PLATE

1. PE NOTES:
   1. Ensure the hex nut is torqued to 13-14Nm after all parts of mount are assembled.
   2. Screw photocell (part 546 = standard drawing 1699) into PE cell mount until snug and the inner O-ring is compressed sufficiently to be water tight.
   3. Dimensions are in millimetres unless shown otherwise.

PE CELL MOUNT
