## **Boat ramp resurfacing works complete at Rosslyn Bay**

Maritime Safety Queensland has completed resurfacing works on the Rosslyn Bay Boat Harbour (Breakwater Drive) boat ramp, with the facility now reopened for use.

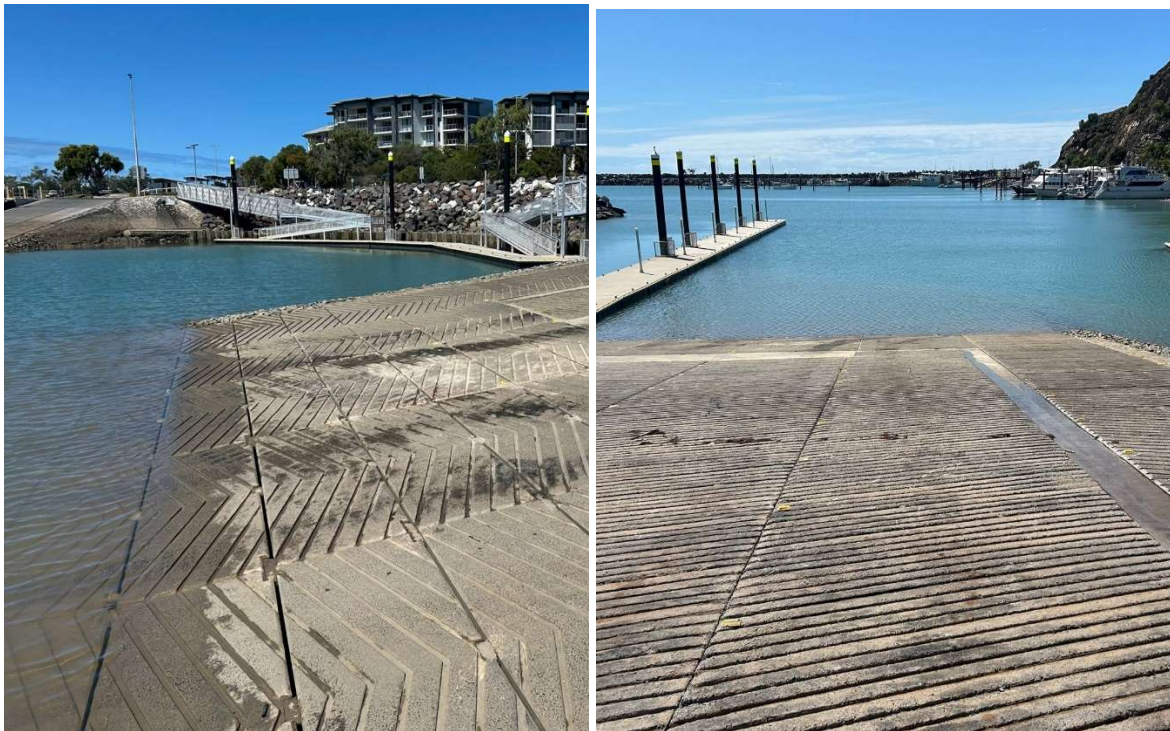

The important maintenance works saw the lower half of the boat ramp resurfaced, with over 100 concrete planks replaced.

The contractor, Australian Marine and Civil Pty Ltd, completed the job ahead of schedule.

This enabled the facility to be reopened for use on 5 September, in time for the busy school holiday period later this month.

The upgrade provides significant safety improvements for boaties and will make vessel launching and retrieval easier.

Maritime Safety Queensland would like to thank the community for its patience and cooperation during the works.
