TMR Community Media Alert

Community feedback sought on New England Highway intersection

The Department of Transport and Main Roads is seeking community feedback on safety improvements for sections of the New England Highway between East Greenmount and the Cunningham Highway intersection.

Improvements being considered include removing roadside hazards, intersection upgrades, extending existing culverts and installing guardrails.

Additional safety upgrades include road widening at the Nobby Connection Road intersection and incorporating a dedicated right-turn lane.

Community engagement – which is part of the detailed design process – will occur over the coming months and will help design the most appropriate safety solutions for this area.

Detailed design is expected to be completed by August 2025 with construction to commence early 2026.

The Queensland Government has proudly invested \$5 million to design and construct these safety upgrades through the Targeted Road Safety Program.

All road users who travel this section of the New England Highway are encouraged to provide feedback by emailing DownsSWR.Office@tmr.qld.gov.au, or calling 4639 0777.
