Construction to begin on pedestrian safety improvements in Pomona

- Construction will soon begin on the first stage of pedestrian safety improvements in Pomona.
- Stage 1 includes a new raised pedestrian crossing, two raised township entry treatments and a 40km/h speed limit on Factory Street.
- The improvements respond to community feedback and advocacy for safer walking conditions in the town centre.

The Queensland Government is delivering on its commitment to create safer, more walkable streets in Pomona, with construction on the first stage of improvements set to start later this month.

The first stage of improvements focuses on Factory Street and includes a new raised pedestrian crossing, two raised township entry treatments, street lighting to improve visibility, and a reduced speed limit of 40km/h.

These measures will improve pedestrian safety and help slow traffic through the town centre, whilst helping protect Pomona's village character.

Stage 2 of the improvements will include the remaining treatments within the Pomona town centre.

Construction is expected to begin in late September 2026, weather and construction conditions permitting. Works will generally be carried out during the day, Monday to Friday.

North Coast Regional Director, Melanie Dei Rossi said the safety works were an exciting step forward for the Pomona community.

"These improvements respond directly to community feedback and will make it safer and easier for people to move through the town centre," Ms Dei Rossi said.

"By delivering safer crossing points and traffic-calming measures, we're helping create a more walkable environment for residents and visitors while supporting the character of this important hinterland town."

"This is the first stage of a broader package of pedestrian safety improvements planned for Pomona, and we look forward to delivering these benefits for the community."
