Have your say on Wellington Point Boating Facilities Upgrade Business Case

Community consultation is now open until Sunday 31 May 2026 on the proposed upgrade to the Wellington Point boating facilities.

The Queensland government is progressing a business case to investigate upgrade options to improve safety, reduce congestion and increase car and trailer parking capacity at this key access point to the Moreton Bay islands.

The need to upgrade the facility was identified in the *Queensland Recreational Boating Facilities Demand Forecasting Study 2022* for the Redland Local Government Area, which highlighted increasing demand and operational pressures at the site.

A leading option has been identified through technical assessment and stakeholder engagement, supported by two alternative options that were also considered as part of the business case.

The leading option would create additional parking by reclaiming land to the east of the existing car park within the Moreton Bay Marine Park, improving safety and efficiency while reducing impacts to nearby greenspace.

Two alternative options were also considered, including a landside parking extension into Wellington Point Reserve and upgrades focused on breakwater infrastructure without expanding parking.

All options involve different site constraints and approval requirements, which will be considered as part of the business case process.

Come along to one of our community information sessions at the Redlands Sporting Club's Palms Auditorium:

- Tuesday 26 May - 12.00pm to 2.00pm
- Wednesday 27 May - 5.00pm to 7.00pm
