1. Enquiries

If you have any questions regarding this document, suggestions for improvement or would like to submit a product for acceptance for use in Queensland, please contact

Transport and Main Roads (DTMR) - Traffic Engineering Practice

Email: Trafficengineering.support@tmr.qld.gov.au

2. Introduction

This document is relevant to temporary kerbing, appropriate for use during long term roadworks to form temporary medians, traffic islands or pavement edges.

This document specifies conditions in relation to:

- Requirements for submitting new REGP products for acceptance as compliant to standards (or resubmitting those previously accepted and lapsed);
- Requirements for extending currently accepted REGP products prior to the 3-year acceptance period concluding; and
- Submission requirements, standards and required inclusions;

3. Governing manuals and associated specifications and guidelines

- Manual of Uniform Traffic Control Devices (MUTCD) as published to the department's website;
- Traffic and Road Use Management Manual (TRUM) as published to the department's website
- Temporary Kerbing Acceptance Checklist.

4. Acceptance of new products as suitable for use in Queensland

For a temporary kerbing product to be accepted as compliant for use in Queensland, the manufacture/distributor needs to complete the checklist provided in **Attachment 1**.

The completed checklist should be accompanied by documents to support the requirements of the checklist, the documents are to be submitted to the nominated contact in Section 1.

Additional documents and information as listed below should also be provided with the completed checklist to support the application process:

1. Dimension and shape
2. General fastening and appearance requirements

A sample must also be provided to allow assessment of marking, standard and packaging to the nominated contact in Section 1.

5. Conditions of Acceptance

All products are accepted on the condition that the manufacture, design and installation are in accordance with the manufacturer's instructions.

A product's acceptance will remain valid for three years from the date nominated on the letter of acceptance. If during this three-year period the product is redesigned in any way (i.e. changes are made to the product that may adversely affect its performance, durability or maintenance requirements), there is a change to any governing specifications, the manufacturing process changes, or the location of manufacturing changes the acceptance will cease and a reapplication for acceptance will be required.

Within two months of any three-year acceptance period expiring, the manufacturer/distributor is to notify the contact officer, nominated in Section 1, of intention to extend for a further three years and nominate either of the following:

- There has been no redesign of the product – further acceptance period granted
- The product has been redesigned – further acceptance period granted based on submission of relevant test results (either full suite or those relevant to the nominated changes)

Products may only be submitted for renewal once, with the maximum acceptance period for any product being six years, upon the lapsing of this six-year period, a reapplication for acceptance must be sought in line with Section 4. Additionally, if the acceptance period is allowed to expire, the product will need to be reassessed as per Section 4.

SECTION 1. APPLICANT INFORMATION

Applicant Name: _____ Date: _____

Applicant Company: _____

Product name: _____

Product distributor: _____

Product manufacturer: _____

Location of manufacturing: _____

Date of letter of acceptance: _____

Contact details on register – name: _____

Corporate email: _____

Phone number: _____

*Note: Please ensure that all relevant fields are filled in with all supporting information and that **SECTION 3 APPLICANT DECLARATION** is completed.*

Completed form to be submitted to trafficengineering.support@tmr.qld.gov.au

Product sample required for each product/product colour. Sample(s) to be sent to:

Attention: Traffic Engineering Practice
Level 6, 313 Adelaide Street
Brisbane City, Qld, 4001

SECTION 2. TEMPORARY KERBING PRODUCTS ACCEPTANCE CHECKLIST

2.1 DIMENSION & SHAPE

Sample of Product Received	Y/N

MUTCD Part 3 Requirement	Y/N	Pass (Y/N)
Not >150mm in height		

2.2 GENERAL

MUTCD Part 3 Requirement	Y/N	Pass (Y/N)
Can be securely fastened		
Appears as a continuous white line at least 150mm wide		

SECTION 3. APPLICANT DECLARATION

I, as a representative of,
(name of applicant) (name of company)

acknowledge and verify that all information provided above is true and agree to the following:

- That I will inform DTMR should any of the information provided above change;
- If the information provided above is found to be incorrect, whether knowingly or unknowingly, DTMR may at their own volition remove the product from the accepted products register; and
- DTMR may at any time request additional information regarding any aspect of the product, sourcing, and manufacturing process.
