

Recommendations for the Design, Construction, and Management of Highly Skewed Bridges (>45°)

Amendment register – July 2026

July 2026 – Initial release

Section	Change type	Description of change
All	New	<ul style="list-style-type: none">This guideline provides best practice recommendations for the design, construction, and management of highly skewed bridges. It emphasises bridge skew as a consideration during the planning, design, construction and management phases of a highly skewed bridge implementation.
