Additional comments (if required):

RASL was undertaken for both Gazettal and Against-Gazettal carriageways.
The results shown above are of the Gazettal carriageway.
The Against-Gazettal Carriageway came out with the same RRM score

STAGE 4 – SPEED DATA SPEED LIMIT (SDSL) ASSESSMENT

Mean Speed (km/h): 72 Speed Data Conforms with Speed Limit (Y/N) : N
Upper Limit of 15km/h Pace Speed (km/h): 82 Speed Limit Suggested by Speed Data (km/h): 80
Percentage within Pace Speed (%): 57.5
Speed Data Speed Limit (km/h): 80

Additional comments (if required) (e.g. dates, times, locations and descriptions of speed data collected):

Speed Data was collected over a 7-day period. Vehicle data recorded on Monday-Friday between 6am and 6pm was utilised for the speed data analysis.
The speed data was collected on a straight segment.
The conditions at the time were clear and dry. The road was free of any road works and maintenance.
Count data was obtained from Speed Data.
While the speed data does not conform (i.e. percentage within pace is less than 60% with existing speed limit of 80 km/h, the upper limit of 15 km/h pace speed (82 km/h) results in suggesting the speed limit of 80 km/h (as per QRSTUV GSM Table 5.2.3) is to be retained.

STAGE 5 – ASSESSED SPEED CONSIDERATION

- 1. Does SDSL Correlate with RASL?
2. Is SDSL lower than RASL?

STAGE 6 – OTHER CONSIDERATIONS

Are there other site specific circumstances that may apply or exist that could affect the selection of an appropriate speed limit? (refer to QRSTUV GSM Section 7 for relevant guidance, sub-sections as per below):

Table with 2 columns: Question, Yes, No. Contains 14 rows of questions regarding school activity, variable speed limits, vehicle classes, traffic carrying roads, rural towns, crash rates, 110km/h speed limits, rough surfaces, temporary speed limits, signalised intersections, on/off ramps, and other circumstances.

Considered Speed Limit (km/h): N/A.....

STAGE 7 – ENGINEER RECOMMENDATION

SUMMARY OF TECHNICAL ASSESSMENTS

Stage 2 – CBSL Apply (Y/N):	N	if Yes, Details:	
Stage 3 – RASL Speed Limit (km/h):	80	Safety Works Required (Y/N):	N
Stage 4 – SDSL Speed Limit (km/h):	80		
Stage 5 – Assessed Speed Limit (km/h):	80	Speed Management Activities Recommended: (Y/N):	N
Stage 6 – Considered Speed Limit (km/h):	N/A	More than one Speed: (Y(km/h)/N):	N
Stage 7 – Recommended Speed Limit (km/h):	80	More than one Speed: (Y(km/h)/N):	N

ENGINEERS RECOMMENDATION:

Does the recommended speed limit align with the technical assessments assessed speed limit summarised above (Y/N): Y

If Yes, provide details of any accompanying works or 'context for suitability of the (QRSTUV GSM Section 8) recommended speed limit (if applicable):

The RASL, due to the IRR appears to indicate a Medium RRM score for this Trunk Collector semi-urban road, and 80 km/h speed limit. The SDSL also indicates that drivers are driving at the existing 80 km/h speed limit. This suggests the retention of the existing 80km/hr speed limit may be appropriate wherever required.

If No, detail alternate recommendation and provide reasons / justification of your (the Engineers) recommended speed limit:
