

G9-21-1

Typical set up example

Notes:

1. This LED warning light panel may be used in conjunction with advanced guide sign G9-21-1 when particular attention will be required to notify the possibility of the road ahead being subject to flooding.
2. The conspicuity devices (flashing lights) shall meet the requirements of AS2144 for 200mm diameter signal lanterns.
3. Stiffener rails used on the light panel should be spaced so as not to interfere with light assembly.
4. Sign support posts shall be spaced to not interfere with the flashing lights assembly.
