Area guide post designation layout**

**SEA Start / End
Guide Post**

**SEA Internal
Guide Post**

Colour Legend

- Pantone 1685C or equivalent
- Pantone 155C or equivalent

Notes:

1. This sticker tape is to be wrapped horizontally around the roadside guide posts to define the linear extent of the significant environmental area (SEA) along the road corridor. Two stickers with a 25 mm gap are to be installed on guide posts that define the start and end of the SEA and a single sticker is to be placed on each of the guide posts within the defined SEA.
2. * The sticker tape is to be supplied in roll lengths determined by the manufacturer.
3. ** In situations where an SEA is on both sides of the road, then two SEA's will be designated and both sides of the road will be marked with guide post SEA tape.
4. The SEA sticker is not required to be retroreflective.
