Areas serviced

These are the locations where the organisation has indicated that it is able to provide services.

Where this is noted as 'N/A', the organisation only provides traffic management services relevant to its own project/construction work and does not provide traffic management services commercially to the public.

Conditions on registration

Conditionally registered organisations have been assessed by as suitable for full registration, subject to finalising one or more scheme elements.

A conditional registration status should not negatively impact on the company's suitability to perform traffic management services during the period of registration.

Scope of registration

O = Operational Traffic Control (traffic control using STOP / SLOW bats and/or portable traffic control devices).

S = Set up / implementation of Traffic Guidance Schemes (TGSs) and Traffic Management Plans (TMPs).

D = Design, presentation and review of TMP and TGS documentation.

Site inspections and audits

Organisations having 'D' on scope are registered to deliver traffic management site audits and inspection services, in addition to traffic management design services.

Organisations having 'O' or 'S' on scope must ensure compliance to the TGS for the site that the traffic is being controlled for.
