Notice to residents

Retaining wall construction – Aird Lane, Woombye

The Department of Transport and Main Roads (TMR) would like to advise that work to construct new retaining walls on the south-western corner of the Maroochydore Road interchange, adjacent to Aird Lane, will begin in the week commencing **19 October 2020**.

The new retaining walls are required to support the widened Bruce Highway northbound exit ramp to Nambour Connection Road.

Guardrail will also be installed along the exit ramp as part of these works.

To provide a safe work area for construction workers, and to maintain the safety of motorists, a single lane closure will be required on Aird Lane. Temporary traffic signals will be in place to manage traffic safely.

This arrangement will be in place until **late December 2020**, weather and construction conditions permitting.

Refer to the image overleaf for more details.

Working hours

The majority of these works will be undertaken during the day.

Stay up to date

Subscribe to the email service to receive updates about project activities and traffic changes. To register, send your email address to bhmip@tmr.qld.gov.au or call 1800 512 211.

However, due to the nature of the works and their proximity to live traffic, some activities may need to be carried out at night when the traffic volumes are lower. This will ensure the safety of motorists and roadworkers.

Day works:

- Between 6am and 6pm, Monday to Saturday.

Intermittent night works:

- Between 6.30pm and 5am, Sunday to Thursday.

Information about any night works will be provided to local residents prior to the works occurring.

What to expect

- **Traffic control:** Localised traffic changes including a single lane closure on Aird Lane will occur to allow for retaining wall and guardrail installation works. Temporary traffic lights will be used, and traffic controllers may be in place to direct road users. Motorists are advised to allow extra travel time.
- **Audible noise and dust:** Audible noise and possible dust from construction activities, excavators and heavy machinery can be expected. Reversing beepers and flashing lights are a safety requirement and will be used at all times during work hours.
- **Increased construction traffic:** Residents can expect increased construction traffic near the work zone.
- **Temporary lighting:** Lighting towers will be used to light work areas at night.
- **Access:** Access to residential properties will be maintained at all times.
