

Scarborough State Boat Harbour

master plan implementation

Priority public infrastructure upgrade project

The first Scarborough State Boat Harbour master plan implementation project will deliver priority public infrastructure upgrades in master plan precincts 1A,1B and 11B with options for:

- upgraded public realm, pathways and landscaping
- new accessible amenities
- parking facility upgrades, road safety improvements and interventions to deter hooning
- improved recreational boating facilities and access.

Maritime Safety Queensland will develop a precinct concept plan for master plan precincts 1A,1B and 11B and then deliver the first stage of priority infrastructure upgrades within the \$3.9 million budget available.

The initial upgrades will focus on improved land-side facilities for recreational boaties, local community and harbour visitors.
