Notes:

- The above program of works, current as of June 2023, is indicative only and subject to change without notice. For example, projects may be deferred without notice to respond to emerging government priorities.
- The estimated invitation method, expected time to market and approximated contract value for the above projects is indicative only and subject to change without notice.
- Please be advised that the Engineering Consultant Scheme (ECS) PTD 0003-14 closed on 30 July 2023, it has been replaced with the newly established whole of government Standing Offer Agreement called the Infrastructure Building and Construction Panel. Any existing work orders under the finalised ECS will continue until they expire or are terminated.

- The approximate contract value amounts are based on the estimated value of tenders that will be run and finalised in 2023-24. The values reflect expected spend on contracts in 2023-24 and, in some cases, continuing into 2024-25. The values reflect the spend on contracts with Industry rather than total project costs, noting that Department of Transport and Main Roads (TMR) has internal costs and past procurements that may be complete.
- For that reason, the information presented at the project level will be different to the information that is contained within the Queensland Transport and Roads Investment Program therefore a reconciliation between the two documents would not be useful.
- The above is not an exhaustive list of planning done within TMR but rather projects funded through the main TMR planning program. Additional planning projects are funded through other means such as Australian Government funding and other Queensland Government funding sources. Information on other planning projects can be sourced through the Queensland Transport and Roads Investment Program publication.
