

Springfield Central Station

Springfield Central Station will be located opposite the Orion Town Centre on the western side of the Centenary Highway.

The new station has been designed to service the future development and anticipated growth of the greater Springfield area.

The station building will be elevated 18 m above ground level. Once inside the station plaza passengers will have the choice of using the stairs, lift or escalator to access the elevated station platform.

Springfield Central Station precinct

Western underpass

- New local road.
- Pedestrian, cycle and vehicle access under the Centenary Highway.

Eastern underpass

- New local road.
- Pedestrian and vehicle access under the Centenary Highway.

Accessing the station

Pedestrians, cyclists and motorists will access the station from the local road network around the Orion Town Centre via two new underpasses beneath Centenary Highway.

The eastern underpass will provide the most direct access to the station for pedestrians walking from Orion Town Centre and the Springfield Central Station commuter car park. The western underpass will include cycle access.

Both underpasses will have CCTV security and lighting installed and are designed to ensure passenger safety.
