Roads Connecting Queenslanders

Index

A

Access
(see Road Outcomes — Efficient and Effective Transport to Support Industry Competitiveness and Growth, Fair Access and Amenity to Support Livable Communities)
Access on strategic freight routes 59
Base funding allocations for safety and road condition 63
Considerations with other government agencies in partnership (see Road Outcomes — Fair Access and Amenity to Support Livable Communities) 65-66
Fair access across Queensland 63
Improving accessibility for regional, remote and special interest groups 90
Managing access of development and activities within road corridors 85
Managing access of public utilities within road corridors 85-86
Reduce road severance 65
Understanding community needs and expectations 22-23

Air Quality
(see Climate Change)
Integration of roads into the community 65
Managing road system and societal impacts 68-69

Amenity
(see Road Outcomes — Fair Access and Amenity to Support Livable Communities)
Considerations with other government agencies in partnership (see Road Outcomes — Fair Access and Amenity to Support Livable Communities) 65-66
Fair access and amenity to support livable communities 62-66
Freight generating development and routes 65-66
Integrate transport and land use 65
Integration of roads into the community 65
Maintain and enhance community amenity 65
Noise 36, 65, 66, 69, 96
Reduce road severance 65
Visual intrusion 68-69

Assets
(see Road Assets)

B

Business Plan
Main Roads Planning 20-21

C

Capability
Building on our strengths 41-42
Building our organisational capability 47-48
Client leadership role 93-94
Environmentally sustainable business practices 69
Evaluating and reporting on performance 94-96
Main Roads identity 43-44
Working with others 45-46

Challenges for the Road System
Ageing and vast road asset 37-38
Changing travel patterns and work places 33-35
Environmental protection and ecologically sustainable development 35-36
Government initiatives 38
Industry dynamics 30-33
Living in a global economy 36-37
Index

Population dynamics 27-30
Seeking value for money from limited funding 38

Charter of Social and Fiscal Responsibility
Evaluating and reporting on performance 94-96
Understanding government needs and expectations 24-26
Working with others 45-46

Community
(see Road Outcomes, Road Products and Services)
Appropriate level of road transport infrastructure 61
Better information to road users and community through technology 90
Better use of existing infrastructure 75-76
Community amenity and quality of life 65
Community engagement 19, 21-22, 44/45, 62, 75
Considerations with other government agencies in partnership (see Road Outcomes) 56-57, 60-61, 65-66, 70-71
Consistency of road travel 58
Employment in vulnerable communities 92
Employment generation 63
Improve accessibility for regional, remote and special interest groups 90
Improve safety, security and social justice 66
Improved information for motorists and community 54-55, 59, 90
Integration of roads into the community 65
Reduce road severance 65
Right mode for the task 61
Road project delivery 63
Safety for the community – planning and operating state-controlled roads 55
Safety for the community – planning and operation of local roads and land-use development 56
Safety for the community – regulating communication devices 56
Social exclusion 66
Social justice 66
Sustainability of communities 63-64
Training and skills development 64
Understanding community needs and expectations 22-23
We are driving more kilometres 34
Whole-of-government approach to reduce social exclusion 66
Working closely with local government, Indigenous councils and communities 93
Working with others 45-46

Congestion
(see Demand)
Changing nature of work 34-35
Financing for improving urban congestion 61
Importance of roads to freight 32
Influence development patterns in cities and towns 61
Managing congestion 60
Urban congestion 61

Cultural Heritage
Australian National Heritage Charter 68
Considerations for other government agencies in partnership (see Road Outcomes — Fair Access and Amenity to Support Livable Communities) 65-66
Cultural heritage assessment and planning 84
Respecting culture and conserving cultural heritage 64
Cycling
Better use of existing infrastructure 75-76
Considerations for other government agencies in partnership (see Road Outcomes — Fair Access and Amenity to Support Livable Communities, Environmental Management to Support Environmental Conservation) 65-66, 70-71
Developing a total road system integrated with the wider transport and land-use 74
Increasing travel options, including public transport, cycling and walking 83
Integrated pedestrian and cycle ways 23
Integrated Regional Transport Plans 20, 34, 60, 66, 74, 83, 84
Safer access to the road system for cyclists and pedestrians 55, 83
Seamless integration between state and local government roads 79-80
Understanding community needs and expectations 22-23

Development
Considerations with other government agencies in partnership (see Road Outcomes — Safer Roads to Support Safer Communities, Fair Access and Amenity to Support Livable Communities) 56-57, 65-66
Ecologically Sustainable Development 26, 35-36, 47, 69-70
Influence development patterns 61
Integrate transport and land-use 65
Key centres and regional hubs 35
Working with others 45-46

Disaster – Natural and Other
Championing cooperative road management to ensure multi-agency incident management 90
Disaster Mitigation Plan 77
Fitness for purpose 53, 54, 76
Improving accessibility for regional, remote and special interest groups 90
Minimising land degradation 67-68
Natural disaster relief 25
Road closures or restrictions to protect the road asset 79
Safety for the community 55-56
Understanding community needs and expectations 22-23
Understanding government needs and expectations 24-26
Working with others 45-46

Demand
Ageing and vast asset 37
Better use of existing infrastructure 75-76
Consistency of standards matched to the link function 84
Increasing travel options, including public transport, cycling and walking 83
Industry dynamics 30-33
Influence activities and natural developments beyond the road corridor 70
Population dynamics 27-30
Supporting appropriate initiatives aimed at managing travel demand 83
Total road system integrated with wider transport and land-use 74

Declaration of State-controlled Roads
Declaration of state-controlled roads 79
Seamless integration between state and local government roads 79
State-controlled road network sub-sets 79-80
E

Efficient and Effective Transport
(see Road Outcomes – Efficient and Effective Transport to Support Industry Competitiveness and Growth)
Consistency of road travel 58
Develop a network of roads 58
Greater coverage of access on strategic freight routes 59
Improved information to motorists 54-55, 59, 90
Improve road user efficiency 58
Links to other transport modes 59
More efficient road connections 59
Preserve future freight corridors 59
Right mode for the task 61
Strategic approach to an efficient and effective road system 58-59

Ecologically sustainable development
Better environmental outcomes 78
Cleaner production and technology 69
Compensatory habitat 68
Considerations for other government agencies in partnership (see Road Outcomes - Environmental Management to Support Environmental Conservation) 70-71
Deliver holistic social, economic and environmental outcomes 68-69
Ecologically significant sites 68
Ecologically sustainable roads 25, 67
Energy consumption 36, 69
Environmental management to support environmental conservation 67-70
Environmental integrity 68, 70
Environmental performance 69, 96
Environmental protection and ecologically sustainable development 35-36
Minimising land degradation 67-68
Organisational role model 69
Pest species 36
Protecting water bodies 68
Resource conservation 69
Sustainable business practices 69
Vegetation management 68, 70-71
Waste management 69
Working with others 45-46, 69, 70-71

Employment
Employment in vulnerable communities 92
Indigenous transport strategy 41
Road programs that contribute to employment objectives 63
Three viable sectors 92-93
Training and skills 63-64

Environment
(see Integrated Planning Act 1997, Road Outcomes — Environmental Management to Support Environmental Conservation)
Biodiversity
Enhance biodiversity within road corridors 70
Maintain biodiversity in road reserves 68
Climate change
Ageing and vast asset 37-38
Air quality 65, 66, 67-69
Greenhouse emissions 36, 69-70, 75, 78, 96
Environmental audits 69

Environmental targets 69

Freight-generating developments and routes 65-66

Government initiatives 38

Integration of roads into the community 65

Managing road system and societal impacts 68

National legislation, policy and programs 26

Provide appropriate levels of road-transport infrastructure 61

Scenario planning 39

Seeking value for money from limited funding 38

Understanding government needs and expectations 24-26

Working with others 45-46, 69-71

Road corridor

Preservation of specific classes of flora and fauna 84

Revegetation of road corridors 84-85

Valuing road corridors as an environmental resource 84

Natural hazards

(see Disaster – Natural and Other)

Improved information for motorists 59

Mitigation strategies 68

Reduce road severance through improved community links 65

Understanding community needs and expectations 22-23

Executive Summary 9-13

Evaluation and Reporting

Multi-factor evaluation process 94

Performance criteria 94

Performance measures 95

F

Federal Government

(see Financing and Funding)

Balancing freight-efficient vehicles with road asset protection 78

Efficient and safe road-freight operations and improved road asset protection 88

Environment 26

Greater coverage of access on strategic freight routes for freight efficient vehicles 59

Influencing efficient and safe road-freight operations 88

Main Roads planning 20-21

National Competition Policy 26

Natural disaster relief 25

Road safety 26

Seeking value for money 38

State-controlled road network sub-sets 79

Understanding government needs and expectations 24-26

Fitness-for-purpose

Consistency of road standards 53-54

Fitness for purpose affordable standards for new works 76

Staged upgrading 54

Freight

(see Road Outcomes – Efficient and Effective Transport to Support Industry Competitiveness and Growth, Products and Services)

Apply intelligent transport systems to improve road operations 89

Appropriate levels of road infrastructure 61

Balancing freight-efficient vehicles with asset protection 78

Better use of existing infrastructure 75-76

Considerations with other government agencies in partnership (see Road Outcomes)
Efficient and Effective Transport to Support Industry Competitiveness and Growth 60-61
Consistency of standards matched to link function 84
Consistency of road travel 58
Develop network of roads in stages 58-59
Develop urban freight routes 60
Driver fatigue 54-56, 89
Forgiving road environment 54
Freight generating areas 61
Greater coverage of access 59
Identify and preserve future freight corridors 59
Importance of roads to freight 32
Improved information for motorists 54-55, 59, 90
Influence efficient and safe road-freight operations 88
Influence type of freight vehicles to reduce travel and infrastructure costs 61
Innovative operation measures 88-89
Links to other transport modes 59-60
Matching use to the function 77
Planning for use of the road system 77-78
Reliability and efficiency of urban road travel 60
Right mode for the task 61, 78
Safer travel for all road users 53-55
Strategic approach to an efficient and effective road system 58-59
Understanding industry needs and expectations 23
Urban freight routes 60
Whole-of-government approach to freight generating areas and freight routes 61
Whole-of-government approach to major freight-generating developments 65-66
Whole-of-government approach to safer travel dynamics 56

Financing and Funding
(see Federal Government)
Base funding allocations 63
Improving urban congestion and expansion 61
Public-private partnerships 80-81
Seeking value for money 38

Globalisation
Living in a global economy 36-37

Government
(see Government Priorities)
Delivery of whole-of-government outcomes 19-20
Driven by whole-of-government outcomes 18-19
Government initiatives 38-39
Understanding government needs and expectations 24-26

Government Priorities
Driven by whole-of-government outcomes 18-19
Evaluating and reporting on performance 94-96
Government priorities 24
Minister’s Statement 2-3
Seeking value for money 38
Understanding government needs and expectations 24-26
Index

H

Hazards
(see Disaster – Natural and Other)
Safety for the community - natural hazards and mitigation 55-56
Understanding government needs and expectations 24-26

I

Indigenous
(see Cultural Heritage, Employment)
A decentralised organisation driven by local needs and consultation 41
Improving accessibility for regional, remote and special interest groups 90
Road project choices 91-93
Working closely with local government, Indigenous councils and communities 93
Working with others 45-46

Industry
(see Road Outcomes – Efficient and Effective Transport to Support Industry Competitiveness and Growth)
An industry profile – tourism 33
Consistency of road travel 58
Considerations with other government agencies in partnership (see Road Outcomes — Efficient and Effective Transport to Support Industry Competitiveness and Growth) 60-61
Contribution of industry to gross regional product 30, 31
e-commerce 23
Efficient road connections 59-60
Future freight corridors 59
Greater coverage of access 59
Importance of roads to freight 32
Improved information for motorists 54-55, 59, 90
Industry dynamics 30-33
Road user efficiency 58
Strategic approach to an efficient and effective road system 58-59
Understanding industry needs and expectations 23

Integrated Planning
(see Integrated Planning Act 1997)
Delivery of whole-of-government outcomes 19-20
Integrate transport and land-use 65
Integrated Regional Transport Plans 20, 34, 60, 66, 74, 83, 84
Regional Frameworks for Growth Management 19, 35, 74
Road corridor choices 82-86
Road system choices 74-81
Statewide planning 20

Integrated Planning Act 1997
Considerations for other government agencies in partnership (see Road Outcomes — Safer Roads to Support Safer Communities) 56-57
Integrate transport and land-use 65
Planning with other state government agencies 46
Whole-of-government strategic solutions to safer road environments for cities and towns 57

Intelligent Transport Systems
Apply intelligent transport systems to improve road safety 55
Applying intelligent transport systems to improve road operations and safety 89
Balancing freight-efficient vehicles with asset protection 78
Better use of existing infrastructure 75-76
Identifying and implementing innovative operations measures to address road safety 88-89
Influencing efficient and safe road-freight operations 88
Improve information to road users 54-55
Planning for use of the road system 77-79
Providing better information to users 90

Local Government
(see Road Outcomes, Road Products and Services, Integrated Planning)
Changing travel patterns and work places 33-34
Considerations with other government agencies in partnership (see all Roads Outcomes) 56-57, 60-61, 65-66, 70-71
Delivery of whole-of-government outcomes 19-20
Future freight corridors 59
Influence planning and operation of local roads 56
Integrated local plans 20
Integrated total road network 80
Joint management of Main Roads/local government roads of regional significance 80
Local government planning schemes 20
Main Roads planning 20-21
Natural disaster relief 25
Road corridor choices 82-86
Road operation choices 87-90
Road project choices 91-93
Road system choices 74-81
Seamless integration between state and local government roads 79-80
Three viable sectors 92
Understanding government needs and expectations 24-26
Working with others 45-46

Land-use
(see Integrated Planning, Road Outcomes)
Building our organisational capability 47-48
Understanding government needs and expectations 24-26
Working with others 45-46

Livability
(see Road Outcomes — Fair Access and Amenity to Support Livable Communities, Road Products and Services)
Considerations for other government agencies in partnership (see Road Outcomes, Fair Access and Amenity to Support Livable Communities) 65-66
Employment objectives 63
Fair access across Queensland 63
Integration of roads into the community 65
Provide appropriate levels of road transport infrastructure 61
Respecting culture and conserving cultural heritage 64
Safety for the community 55-56
Understanding community needs and expectations 22-23

Main Roads
A decentralised organisation 41
A focus on the Transport Portfolio 18
A good road agency and a good government agency 44
An organisation based on professional and
technical excellence 41-42
Evaluating and reporting on performance 94-96
Identity 43-44
Listening to and engaging stakeholders 22
Main Roads planning 20-21
Organisational capability 47-48
Road system planning 21
The organisation 21
Transport Planning and Coordination Act 1994 79

Maintenance
A program of projects that focuses on road outcomes and greater consistency 91-92
Damages to roads policy 78
Deliver holistic social, economic and environmental outcomes 68-69
Ensure all state-controlled roads are maintained in a safe and serviceable condition 63
Greater coverage of access on strategic freight routes 59
Greater focus on maintenance of the existing asset 76-77
Managing delivery for improved efficiency 93
Minimise the land impacts of roads 67-68
Provide greater safety to the mix of heavy and light vehicles 54

Mobility
(see Access)
Better use of existing road infrastructure 75-76
Changing travel patterns and work places 33-35
Fair access across Queensland 63
Greater focus on maintenance of the existing asset 76-77
Improved safety, security and social justice for road users and the wider community 66
Increasing travel options, including public transport, cycling and walking 83
Planning for use of the road system 77
Reduce social exclusion 66
Special needs 23
Understanding community needs and expectations 22-23
Women's mobility 34

N
National Competition Policy
Federal government 25

O
Operations
(see Road Operation Choices)
Considerations for other government agencies in partnership (see Road Outcomes – Efficient and Effective Transport to Support Industry Competitiveness and Growth) 60-61

P
Partnerships
(see Local Government, Transport Portfolio)
Considerations with other government agencies in partnership (see all Road Outcomes) 56-57, 60-61, 65-66, 70-71
Delivery of whole-of-government outcomes 19-20
Working with others 45-46

Pedestrians
Better use of existing infrastructure 75-76
Index

Increasing travel options 83
Integrated multi-modal transport corridors 83
Safer access to the road system 55
Understanding community needs and expectations 22-23

Performance Measurement
Reporting on our performance 94-96

Planning
A total road system integrated with wider transport and land-use 74
Integrated Regional Transport Plans 20, 34, 60, 66, 74, 83, 84
Local government planning schemes 20
Main Roads planning 20-21
Queensland Smart State 24-25
Regional frameworks for growth management 19-20, 35, 74
Road system planning 21
State Infrastructure Plan 24
State-wide planning 20

Population
Looking ahead 27
Population ageing 29
Population diversity 30
Where will people be living? 27

Project Management
Post-project evaluation and post-program feedback 92
Program of projects that focuses on road outcomes 91
Project types 92
Selection and priority 92
Staged project management 92

Program Management
Program of projects 91-92
Project types 92
Selection and priority 92

Public Transport
Changing travel patterns and work places 33-35
Considerations with other government agencies in partnership (see Road Outcomes – Fair Access and Amenity to Support Livable Communities) 65-66
Environmentally sustainable transport modes 68
Increasing travel options, including public transport, cycling and walking 83
Integrated multi-modal corridors 83
Integrated Regional Transport Plans 20, 34, 60, 66, 74, 83, 84
Integrated total road network 80
Population ageing 29
Reduce social exclusion 66
Road system choices 74-81

Public Utilities
Managing access of public utilities in road corridors 85

Q

Queensland Government
(see Government)
(see Government Priorities)
(see Whole-of-Government Approach)

Queensland’s Roads
Local government roads 16
State-controlled road network 16
Regional Frameworks for Growth Management
A total road system integrated with wider transport and land-use 74
Delivery of whole-of-government outcomes 19-20
Development of key centres 35
Regional frameworks for growth management 20

Risk Management
‘Fitness for purpose’ affordable standards for new works 76
Identify and preserve future land for new road corridors 59
Improved road network safety using a risk management approach 53
Innovative operations measures to address road safety and freight and traffic management 88-89
Managing delivery for improved efficiency 93
Protect future land for new road corridors and future road widenings 84

Road Assets
Ageing and vast road asset 37-38
Balancing freight-efficient vehicles with road asset protection 78
Improved road asset protection 88
Road closures or restrictions to protect the road asset 79

Road Network Strategy
An evolving road strategy 16-17

Road Outcomes
Environmental conservation
(see Environmental Management to Support Environmental Conservation) 67-71
Industry competitiveness and growth
(see Efficient and Effective Transport to Support Industry Competitiveness and Growth) 58-61
Livable communities (see Fair Access and Amenity to Support Livable Communities) 62-66
Safer communities (see Safer Roads to Support Safer Communities) 53-57

Road Outputs
(see Road Outcomes)
Efficient and effective transport 58-61
Environmental management 67-71
Evaluating and reporting on performance 94-96
Fair access and amenity 62-66
Safer roads 53-57

Road Products and Services
Road corridor 82-86
Road operation 87-90
Road project 90-93
Road system 74-81
Road corridor
Better road corridor management 85-86
Conducting road safety audits 86
Consistency of standards matched to link function 84
Corridor management 85
Cultural heritage assessment and planning 84
Enhance biodiversity in road corridors 70
Increasing travel options 83
Influence activities and development beyond the corridor 70-71
Initiatives aimed at travel demand 83
Integrated multi-modal corridors 83
Managing access of developments and activities 85
Managing access of public utilities 85-86
Overview 49
Planning to operate road corridors to fit within overall strategic intent of system 82
Revegetation of road corridors 84-85
Risk management to protect future land 84
Presentation of specific classes 84
Valuing road corridors as an environmental resource 84-85

**Road operation**
Applying intelligent transport systems to improve road operations and safety 89
Championing cooperative road management 90
Identify and implement innovative operations measures to address road safety, freight and traffic management 88
Improving accessibility for regional, remote and special interest groups 90
Influencing efficient and safe road-freight operations and improved asset protection 88
Operating road corridors to fit within overall strategic intent 88
Overview 49
Providing better information to road users and the community through technology 36, 54, 90

**Road project**
Maintain three viable sectors 92-93
Managing delivery for improved efficiency 93
Post-project and post-program feedback 92
Program of projects focused on outcomes and greater consistency 91
Project selection and priority 92
Overview 49

Staged project management for greater control 92
Taking a client leadership role 93
Three viable sectors 92
Working closely with local government, Indigenous councils and communities 93

**Road system**
Balancing Freight-efficient vehicles with road asset protection 78
Basic right of transport infrastructure 77
Better environmental outcomes 78
‘Fitness for purpose’ affordable standards 76
Better use of existing infrastructure 75-76
Declaration of state-controlled roads 79
Fitness for purpose affordable standards 76
Balancing freight-efficient vehicles with asset protection 78
Greater focus on maintenance 76-77
Integrated total road network 80
Joint Main Roads/local government management of roads 80
Manage network risks and project risks 76
Matching use to the desired road function 77-78
Overview 49
Planning for use 77
Public-private partnerships 80
Road closures or restrictions 79
Road system integrated with wider transport and land-use 74
Seamless integration between state and local government roads 79
Staged upgrading approach 76
State-controlled road network sub-sets 79-80
Strategic approach to an efficient and effective road system 58-59
Road Safety

(see Road Outcomes, Road Products and Services)

Black Spot Program 26, 45, 53
Championing cooperative road management 90
Considerations with other government agencies in partnership (see Road Outcomes — Safer Roads to Support Safer Communities) 56-57
Consistency of road standards 84
Driver fatigue 54, 56, 89, 54
Fatality rate 53
Hospitalisation rate 53
Identifying and implementing innovative operations measures to address road safety 88-89
Improve safety, security and social justice 66
Improve safety using a strategic risk-management approach 53-54
Influencing efficient and safer road freight operations 88
Information about road conditions 54-55, 59, 90
Intelligent transport systems application 88-90
Managing speed 55, 56
National Road Safety Strategy 26
Queensland Road Safety Strategy 53, 87
Regulation of products 56
Road safety audits 86, 89
Road safety engineering practices to provide a forgiving road environment 54
Roadside amenities 54
Risk management approach 53
Safer access for cyclists and pedestrians 55
Safer travel dynamics 56-57
Safety for the community – planning and operating state-controlled roads 55
Safety for the community – planning and operation of local roads and land-use development 56
Safety impacts of traffic incidents 57
Safety to the mix of heavy and light vehicles 54
Understanding community needs and expectations 22-23
Whole-of-government approach 56-57
Worksite safety 56

Road Use

Better environmental outcomes 78
Considerations with other government agencies in partnership (see Road Outcomes — Efficient and Effective Transport to Support Industry Competitiveness and Growth, Fair Access and Amenity to Support Livable Communities, Safer Roads to Support Safer Communities) 56-57, 60-61, 65-66
Consistency of standards matched to the link function 84
Matching use to the desired road function 77-78
Planning for use of the road system 77-78
Queensland Road Use Management Strategy 87

Road Users

(see Road Outcomes, Road Products and Services, Road Use)

Improve safety, security and social justice 66
Information about road conditions 54-55, 59, 90
Managing network risks as well as project risks 76
Providing a basic right of transport infrastructure and services for all road users 77

Roads Implementation Program

Evolving road strategy 16-17
Road project choices 91-93
Road system planning 21

Rural and Remote
(see Community, Indigenous, Road Outcomes, Road Products and Services)
Considerations with other government agencies in partnership (see Road Outcomes — Fair Access and Amenity to Support Livable Communities) 65-66
Employment generation 63
Greater coverage of access 59
Fair access across Queensland 62
Industry dynamics 30-33
Population dynamics 27-30
Roads shaping Queensland 16
Social exclusion 66
Social justice 66
Three viable sectors 93-94
Understanding community needs and expectations 22-23

S
Safety
(see Road Safety)

Scenario Planning
Meeting the challenges 39

Social Justice
(See Government Priorities)
Delivery of whole-of-government outcomes 19-20
Social exclusion 66
Social justice 66

Smart State
Smart State Strategy 24-25

Speed
(see Road Safety)

Stakeholders
Community engagement 19, 21-22,
44-45, 63, 76
Evaluating and reporting on performance 94-96
Knowing our stakeholders 22-26
Main Roads planning 20-21
What is driving our roads? 19

Standards
Consistency of standards matched to link function 84
Consistent quality, standards and comfort 23
Improve consistency of road standards to match function 53-54
Professional and technical excellence 41-42
‘Fitness for purpose’ standards 76

State-controlled roads
(see Declaration of State-controlled Roads)
Integrated total road network 80
Joint Main Roads/local government management of local roads of regional significance 80
Main Roads — more than just a road builder 16
Road network sub-sets 79-80

Strategic Plan
(see Main Roads Planning) 21
The next steps 96
Transport Portfolio - Main Roads and Queensland Transport
(see Road Outcomes, Road Products and Services)
A focus on the Transport Portfolio 18-19
An evolving road strategy 16-17
Better use of existing infrastructure 75-76
Changing travel patterns and work places 33-35
Considerations with other government agencies in partnership 56-57, 60-61, 65-66, 70-71
Delivery of whole-of-government outcomes 19-20
Government initiatives 38
Identifying and implementing innovative operations measures 88
Increasing travel options, including public transport, cycling and walking 83
Industry dynamics 30-32
Influencing efficient and safe road-freight operations and improved road asset protection 88
Integrated planning 19-20
Integrated regional transport plans 20, 34, 60, 66, 74, 83, 84
Integration of roads into the community 65
Links to other transport modes 59-60
Main Roads planning 20-21
Major freight-generating developments and routes 65-66
Queensland Road Safety Strategy 53, 87
Planning for use of the road system 77
Portfolio principles 3
Portfolio vision 2
Safer access to the road system for cyclists and pedestrians 55
Scenario planning 39
Supporting appropriate initiatives aimed at managing travel demand 83
Understanding government needs and expectations 24-26
Whole-of-government approach to improve road use safety 56
Whole-of-government approach to safer travel dynamics 56-57
Whole-of-government approach to the 'world around us' to protect the environment 70
Working with others 45-46

Travel Demand
(see Demand)
Managing travel demand 83

Tourism
An industry profile – tourism and roads 33

Urban
(see Community, Road Outcomes, Road Products and Services)
Changing travel patterns and work places 33-35
Financing for improving urban congestion and expansion 61
Home-based work and more flexible work 35
Key centres and hubs 35
Operating road corridors 82
Population dynamics 27-30
Provide appropriate levels of road transport infrastructure to support and influence development patterns in cities and towns for the future 61
Reliability and efficiency of urban travel 60
Reporting on our performance through the right measures 94-96
Right mode for the task 61
Social exclusion 66
Social justice for road users and the wider community 66
Understanding community needs and expectations 22-23
Urban freight routes 60

Values
(see Cultural Heritage, Environment)
Building our organisational capabilities 47-48
Road project choices 91-93
Safety for the community 55-56

Vision Statements
Main Roads vision 4
Portfolio vision 2

Whole-of-government Approach
(see Government, Government Priorities)
Efficient and effective transport 58-61
Considerations with other government agencies in partnership (see Road Outcomes — Efficient and Effective Transport to Support Industry Competitiveness and Growth) 60-61
Delivery of whole-of-government outcomes 19-20
Driven by whole-of-government outcomes 18-19
Financing for improving urban congestion and expansion 61
Freight generating areas and freight routes 61, 76
Levels of road transport infrastructure to support and influence development patterns 61
Reliability and efficiency 60
Right mode for the task 61

Type of freight vehicles 61
Urban freight routes 60

Environmental conservation
Considerations with other government agencies in partnership (see Road Outcomes — Environmental Management to Support Environmental Conservation) 70-71
Enhance biodiversity in road corridors 70
Influence activities and natural developments beyond the corridor 70-71

Livable communities
Considerations with other government agencies in partnership (see Road Outcomes — Fair Access and Amenity to Support Livable Communities) 65-66
Major freight-generating developments and routes 65
Social exclusion 66
Social justice 66

Safer communities
Considerations with other government agencies in partnership (see Road Outcomes — Safer Roads to Support Safer Communities) 56-57
Improve road safety 56
Managing safety impacts of traffic accidents 57
Safer travel dynamics from heavy freight vehicles 56-57
Strategic solutions to safer environments for cities and towns 57

Worksite
Worksite safety 56

Climate zone, an ageing and vast asset 37-38
Fatigue zones, safer travel for all road users 54
