Preface

Product Index for Bridges and Other Structures (Product Index) is a document produced to assist design and construction staff in locating materials to construct and maintain bridges and other structures that conform to the Department of Transport and Main Roads' Specifications.

This document and other approved supplier lists are published on the departmental website at <http://www.tmr.qld.gov.au/business-industry/Business-with-us/Approved-products-and-suppliers/Bridges-and-other-structures-approved-products-and-suppliers.aspx>

This document is maintained by Engineering and Technology Branch (Structures). Enquiries should be directed, as indicated in the relevant product entry, to:

Dr Stephen Rae (Structures Construction Materials) on 3066 1162
(TMRStructuralMaterials@tmr.qld.gov.au) or

Mr Jayaratna Mahagamage (Structures Reviews and Standards – SRS) on 3066 8628.

This document includes products which fall into two categories:

1. Registered products and suppliers are evaluated against Transport and Main Roads specification requirements and are specifically mentioned as requiring registration, usually in Table 1 of the relevant technical specification. Products or suppliers of this category may not be used on departmental projects unless they are on the list.
2. Conforming products and suppliers are also evaluated against departmental specification requirements. Products or suppliers of this category may be used on departmental projects if they are not on this list.

In both cases it is the responsibility of the Contract Administrator to approve the use of products or suppliers for each individual project and monitor conformance requirements. Listing does not guarantee confirming performance of individual product supplied. Inspection and/or batch testing may be required.

The applicable specifications are referenced in the product listing.

The performance and suitability of these products for the particular application is ultimately the risk of the Contractor. In all cases, suppliers' instructions must be followed.

Following the main index of this document, a chart cross referencing products and the relevant specifications is included. At the end of the document, full contact details of product suppliers are listed for convenience.

Registration requirements

Certain products and suppliers are governed by a separate registration scheme (BCM-P-015), available on the Transport and Main Roads website:

- Cementitious Materials
- Fabricators of Structural Steelwork
- Prestressing Strand
- Precast Concrete Suppliers
- Reinforcing Steel.

For all other products the following requirements are applicable.

Submissions

Suppliers with products that wish to be considered for inclusion in this Product Index should forward an application (Form STR-F-010, available on request) including:

- company and contact details
- product information including Technical Data Sheets (TDSs), Material Safety Data Sheets (MSDSs) and relevant test results from an independent National Association of Testing Authorities (NATA) certified laboratory
- evidence of compliance to relevant specification or drawing (including version) where applicable
- product usage history
- reference product category in the Product Index and reference Transport and Main Roads Technical Specifications.

A physical sample may also be requested.

Evaluation

Products shall be evaluated against the relevant specifications and, if found conforming, listed in the Product Index on the condition that:

- Product (chemical) composition does not change.
- Product dimensions do not change.
- Performance is maintained.

Should the product composition or design change, or the specification / drawing is updated, a new application submission will be required.

Product removal

Products may be removed from the Product Index for the following reasons:

- discontinuation of supply or availability
- poor performance
- non-compliance to reference specifications.

Suppliers will be notified of removal in writing.

Product Index management

To maintain the accuracy of this Product Index, suppliers shall notify Engineering and Technology of any changes to contact or product details.

Product Index

1 Anchors for prestressing strand

Registered product: MRTS89 Structures Reviews and Standards Technical Governance (SRS)

Supplier	Product name
Australian Prestressing Services Pty Ltd P: 07 3376 4400	APS multi strand system (not including couplers) APS post tensioned slab system
Freyssinet Australia P: 07 3862 0100	Freyssinet 'C' range multi strand system (including mono strand couplers) Freyssinet 'S' range slab tendon system
StrongForce Pty Ltd P: 07 3883 2765	StrongForce multi strand system
SRG Limited P: 07 3442 3500	Slab post tensioning systems BBR Cona multi strand post tensioning system Type K couplers for up to 31 x 12.7 mm strands up to 42 x 15.2 mm extra strands
VSL Australia Pty Ltd P: 02 9484 5944	VSL multi strand post tensioning system (including couplers) VSL post tensioning system for slabs

Systems include anchorages and couplers where indicated. Strands are registered separately.

2 Anti-graffiti protection

Conforming product: MRTS83

SRS

Supplier	Product name
<i>Non sacrificial</i>	
Wattyl Australia Pty Ltd P: 07 3853 2888	Poly U 400 Anti-Graffiti Clear (2 Part)

25 Expansion joints (alternative types)

Alternate product: Project-specific supplementary specification

SRS

These expansion joint types are not within the scope of the current specification MRTS82 *Bridge Deck Expansion Joints*. Therefore, the designer needs to consider joint types specified in MRTS82 firstly and the alternative types shall only be used if the bridge designer demonstrates the benefit of using these joint types. Project specific supplementary specifications shall be developed, reviewed and approved if these joint types are used.

The department is considering incorporating other joint types for the next revision of MRTS82. Therefore, until MRTS82 is revised, evaluations of new products will be undertaken on a case-by-case basis for this expansion joint category.

34 Motor grids

Registered product: Technical Note 18

SCM and SRS

The construction of motor grids is governed by TN18 *Design Criteria for Motor Grids* which sets out the criteria to design and manufacture motor grids. The Department of Transport and Main Roads has published Standard Drawings 1561 to 1564 of motor grids which conform to this Technical Note.

Fabricated steelwork shall be manufactured by a registered Transport and Main Roads fabricator whose scope of registration includes motor grids. Precast concrete components shall be manufactured by a registered Transport and Main Roads casting yard whose scope includes miscellaneous elements.

If a supplier elects to manufacture an alternative design, details of the approval will be recorded here in the Product Index. The steelwork and precast concrete components shall be manufactured by registered suppliers as outlined previously.
